1 How RFPIS works

Read this first. It explains where opportunities come from and what you do with them.

RFPIS finds funding opportunities (RFPs, RFIs, EOIs, calls for proposals and grand challenges) on donor websites and the open web. It checks each one against your organisation's eligibility rules, and helps the team decide to **Proceed**, **Park** or **Decline**.

Where opportunities come from

Collecting opportunities and screening them are two separate steps.

SUPER USER
Extraction
The platform's Super User runs a separate crawl of every donor source and pulls new RFPs into a shared store.

→

AUTOMATIC
Friday scan
Every Friday at 06:00 UTC a scheduled scan crawls the sources again and screens each organisation.

→

YOU GET ALERTED
New calls ready
The 🔔 bell shows "Scan completed", and an email lists any new Proceed or Park calls.

→

YOU
Eligibility Scan
Click 🎯 **Eligibility Scan** to pull the calls that fit your organisation into your pipeline.

→

THE TEAM
Review & decide
Proceed, Park or Decline, then track deadlines and follow-ups.

Raw records vs. your pipeline

Raw records are every call the crawl found, from every country and theme, before any screening. They sit in a shared, platform-wide pool. The **Eligibility Scan** reads that pool against *your* organisation's rules and adds only the calls that fit to your pipeline. A call that any user submits joins the same pool. Other organisations can then find it on their next scan.

The weekly rhythm

FRIDAY
Scan runs
The automatic scan refreshes the store. Watch the 🔔 bell, and your inbox for the new-opportunities email.

FRIDAY – SUNDAY
Screen & submit
Run the Eligibility Scan. Submit any RFP you found outside the scan.

MONDAY CALL
Team meeting
Walk through the Screen tab, agree on decisions, and capture notes and actions.

MID-WEEK
Follow through
Work the Track tab, log donor engagements and close pending actions.

2 Roles: what you can and can't do

Your role shows at the bottom of the left sidebar, under "Signed in as".

Every account has one role. Most team members are **Contributors** or **Reviewers**. Throughout this manual, steps for administrators are marked ADMIN ONLY, and steps for the platform owner are marked SUPER USER. Everything else, meeting notes included, is open to every team member.

What you want to do	Contributor	Reviewer	Admin	Super User
Run the Eligibility Scan, read the pipeline, search	✓	✓	✓	✓
Submit an RFP, update a decision, edit an RFP	✓	✓	✓	✓
Log engagements, resolve pending actions, edit the schedule	✓	✓	✓	✓
Generate and download reports	✓	✓	✓	✓
Add, edit and resolve meeting notes	✓	✓	✓	✓
Delete an RFP	—	—	✓	✓
Edit the organisation (Tenant) profile	—	—	✓	✓
Open **Settings**: users, scan preferences, records, manual scans	—	—	✓	✓
Run the full Extraction, manage organisations, view as another organisation	—	—	—	✓

See a greyed-out button?

Your role doesn't allow that action. Ask your organisation's administrator to change your role. They do this under **Settings → Accounts → Users**.

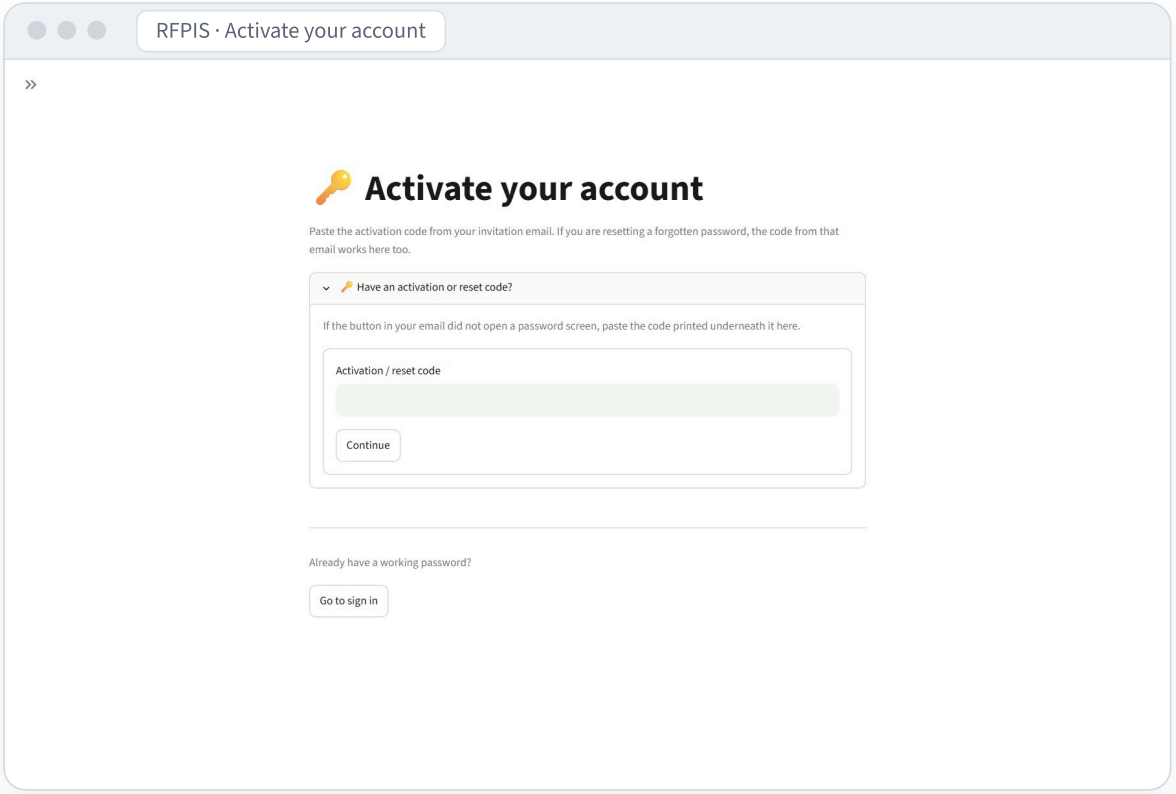

3 Signing in for the first time

Pages: `/activate-account` · `/login` · `/password-reset`

Nobody can sign themselves up. Your administrator creates your account, and RFPIS then emails you an invitation.

A. Activate your account

1. Open the email titled **"Activate your RFPIS APP account"**. It is sent to the address your admin entered, for example *user@example.com*.
2. Click **Activate my account**. The link works for **7 days**. The email also shows an activation code you can paste in instead.
3. On the 🔑 **Activate your account** screen, check that the email is yours, then click **Activate account**.
4. Type a new password twice and click **Save password**.
5. When you see **"Account activated"**, click **Go to sign in**.

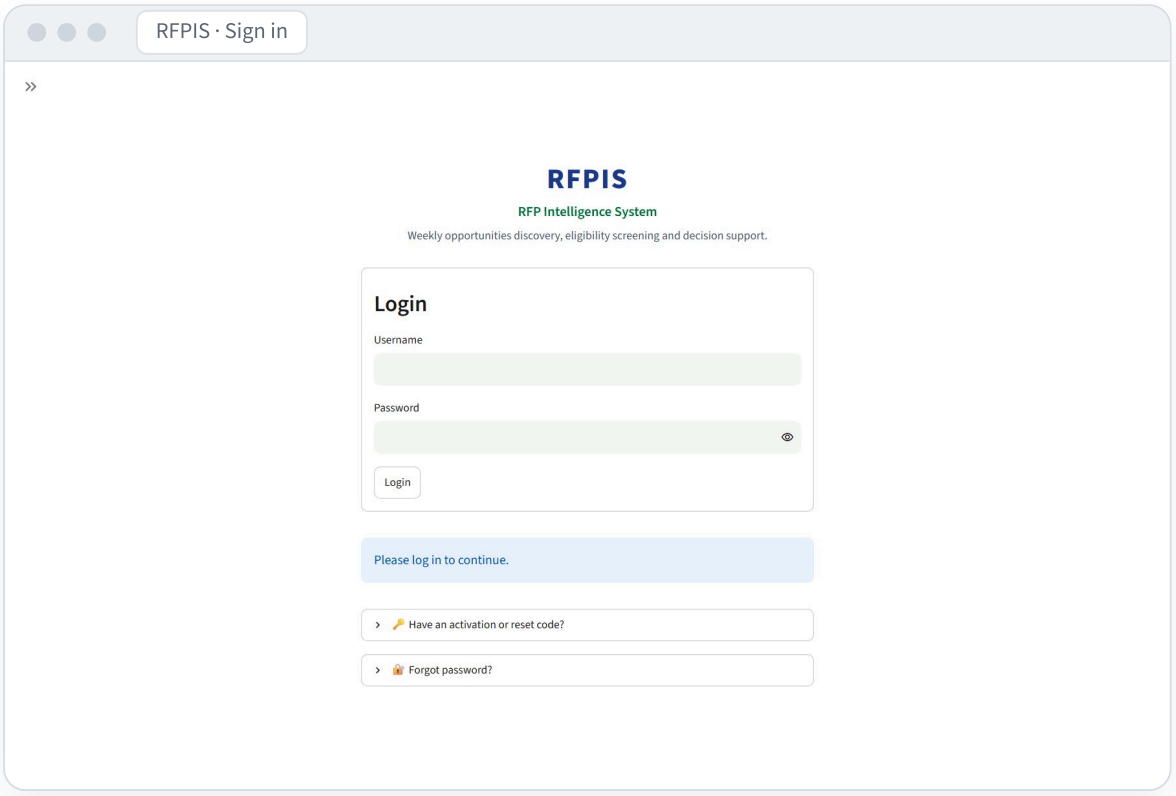

If you only have the code from the email, paste it here and click Continue.

B. Sign in

1. Go to your RFPIS web address. If you aren't signed in, you land on the sign-in screen.
2. In **Username**, type your **email address**.

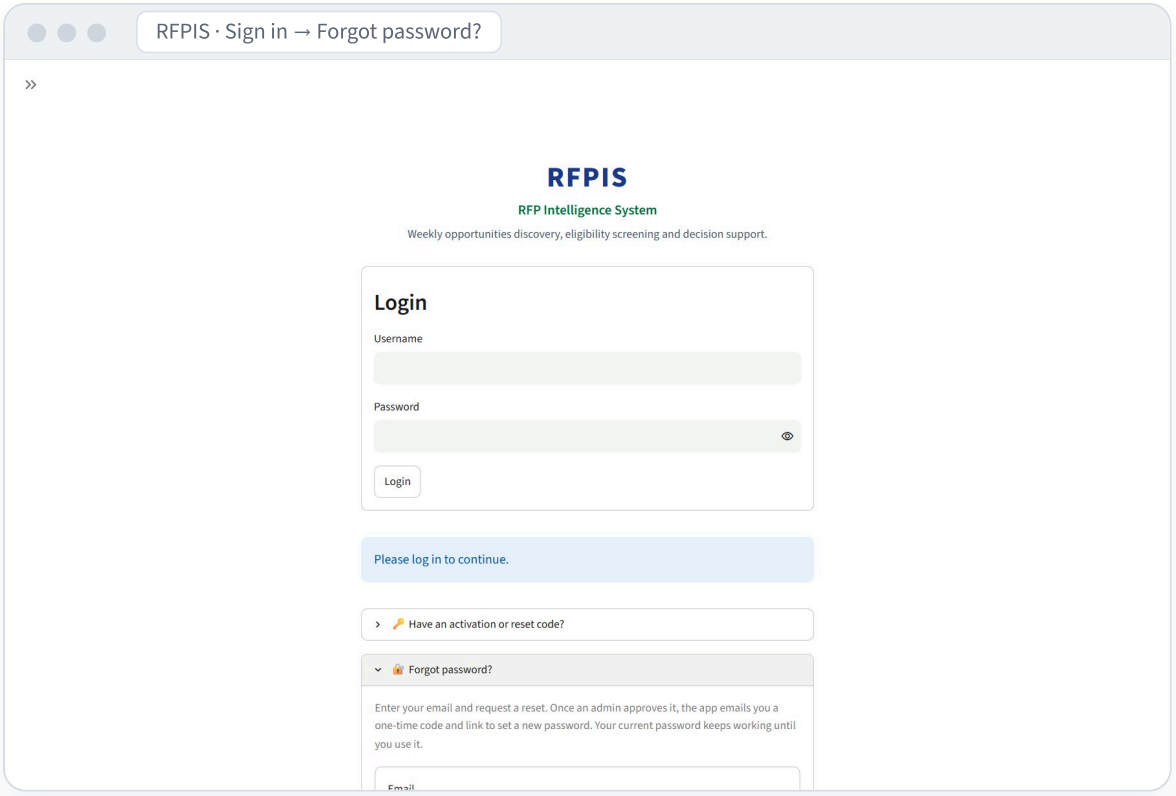

3. Type your **Password** and click **Login**.
4. You arrive on **Home**. You stay signed in for about 8 hours.

The sign-in screen. The two panels below the form handle codes and forgotten passwords.

C. Forgot your password?

1. On the sign-in screen, open **Forgot password?**.
2. Type your email and click **Request password reset**.
3. An administrator approves the request. You then get an email titled **"Change your RFPIS APP password"**. Your old password keeps working until you use the new link.
4. Click **Set a new password** in the email. Or paste its code into **Have an activation or reset code?**. The code expires in **2 hours**.

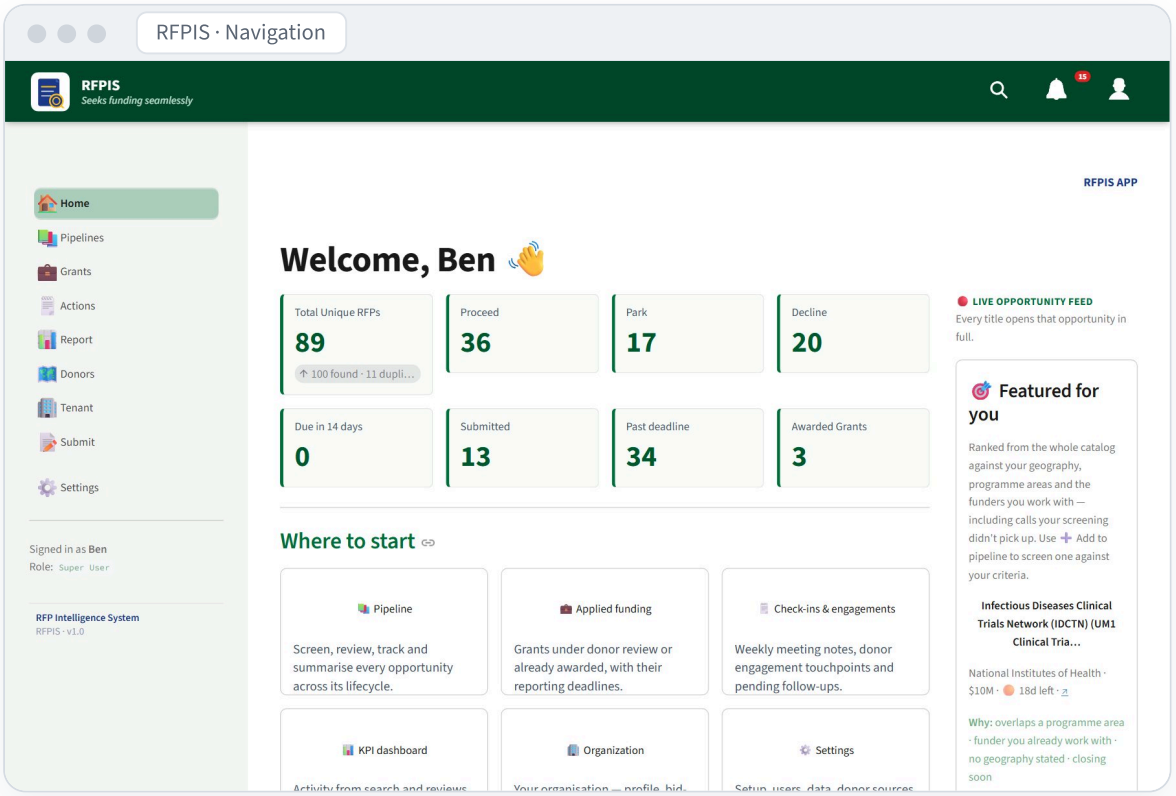

If an admin reset your password

The first time you sign in, RFPIS asks you to choose your own password. Enter the temporary password, then your new one twice, and click **Save new password**.

4 Finding your way around

Every page has the same two navigation areas: the left sidebar and the top bar.

Click «/» at the top of the sidebar to switch between icons only and full labels.

Left sidebar: your work pages

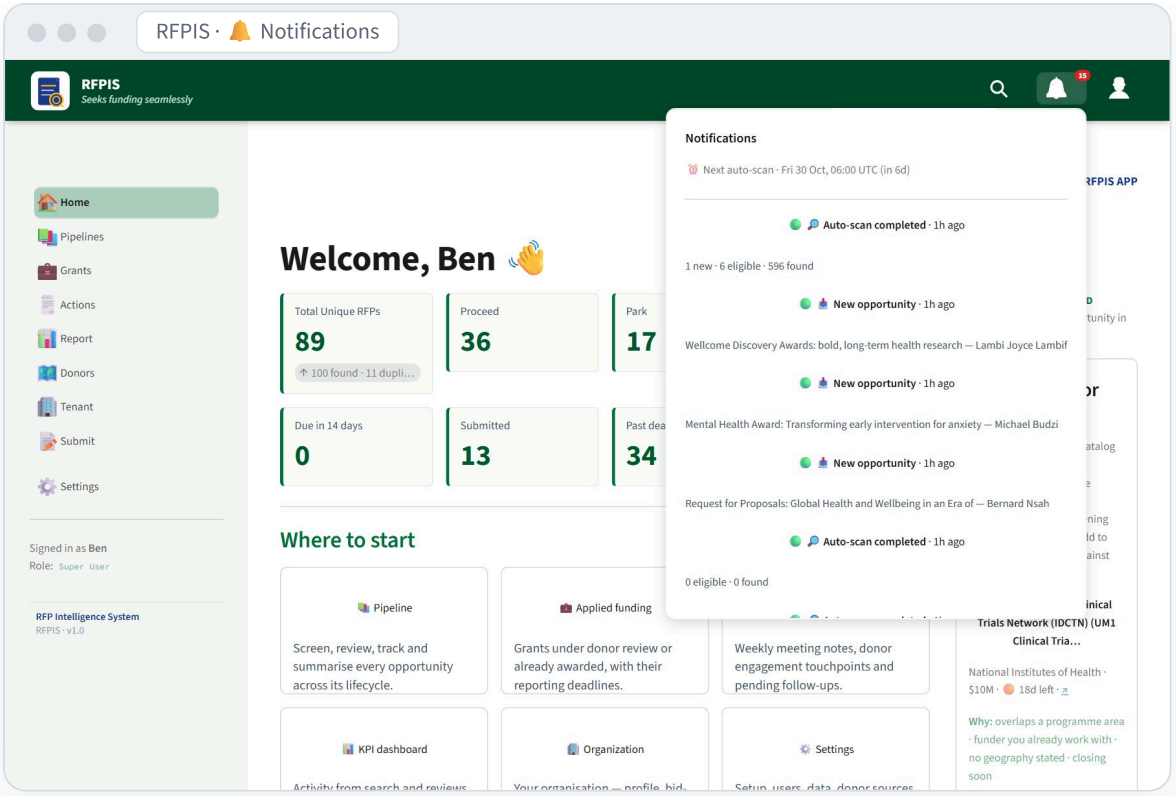

Home · Pipelines · Grants · Actions · Report · Donors · Tenant · Submit. Admins also see Settings. The bottom of the sidebar shows who you're signed in as and your **Role**.

Top bar: tools

Search the app and the web · **Notifications** (scan alerts and new opportunities) · **Person menu** (Help, Tenant, Profile, Sign Out).

The Notifications bell: how you're alerted

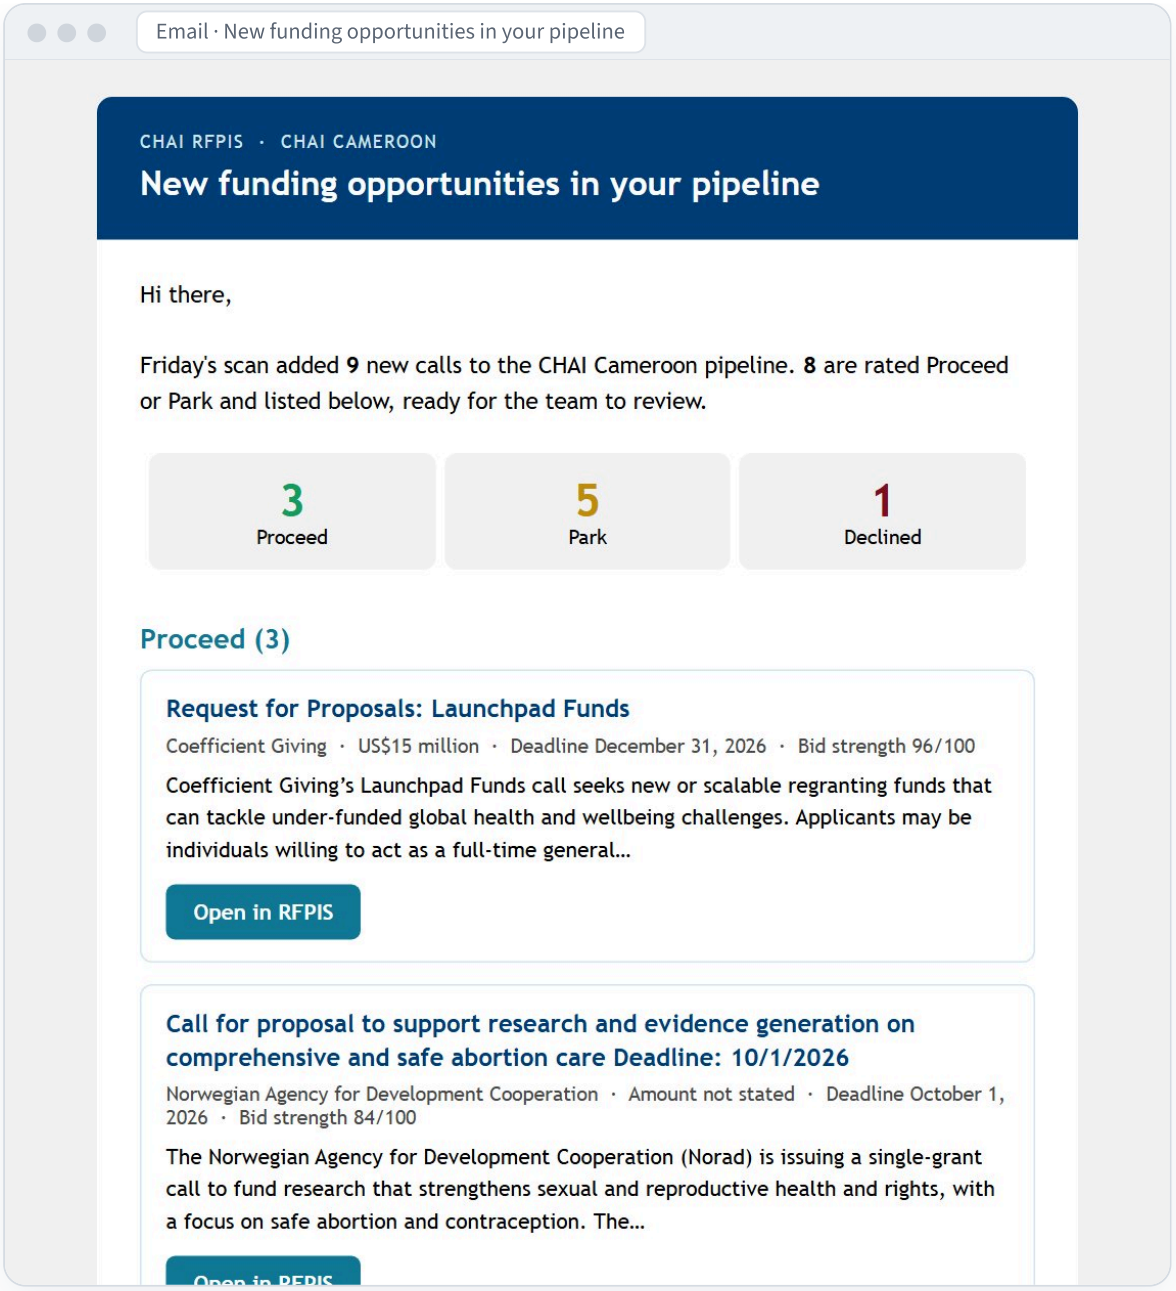

1. A red number on the bell means there are new items since you last looked.
2. Click the bell. At the top, you'll see **Next auto-scan** (Friday 06:00 UTC) and **Next call** with this week's note-taker, presenter and chair.
3. When **"Scan completed"** or **"Auto-scan completed"** appears, new raw records are ready. Go to Pipelines → Screen and run the Eligibility Scan.
4. **" New opportunity"** means a teammate submitted an RFP. Click it to open the opportunity.
5. Click **Mark all as read** to clear the count.

The new-opportunities email

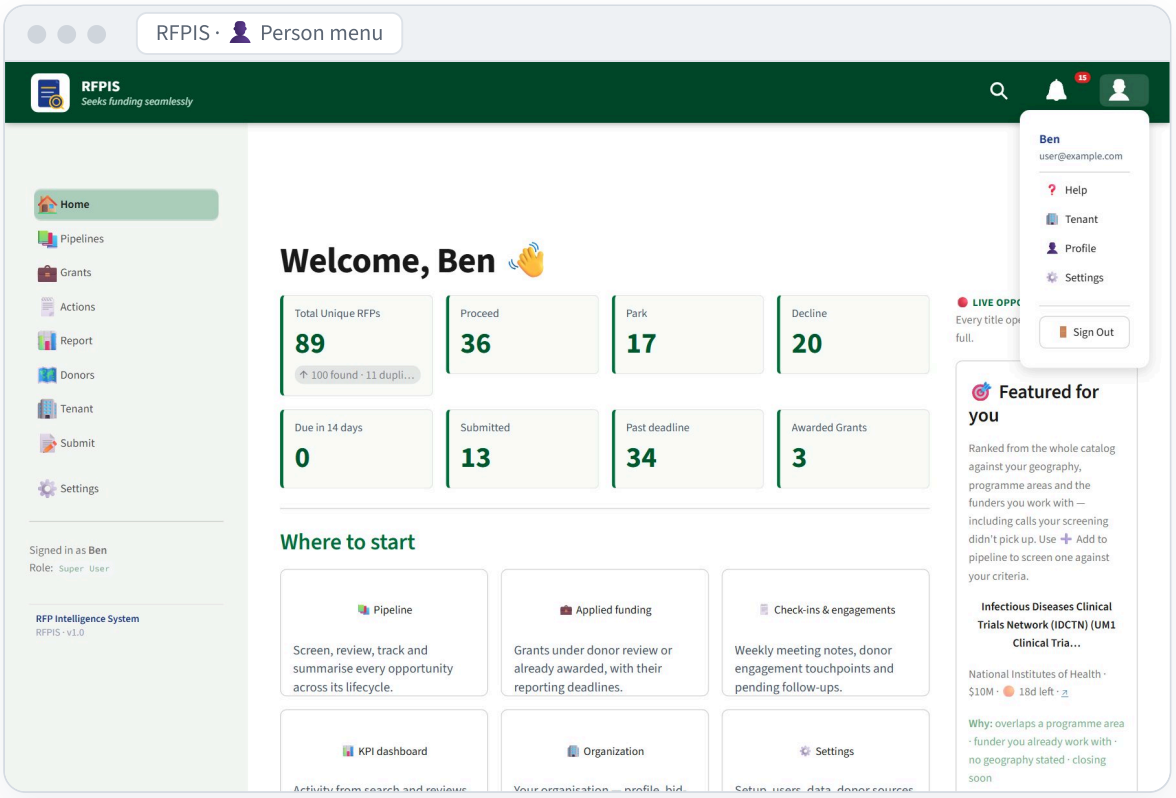

After the Friday scan, if it added any calls rated **Proceed** or **Park** for your organisation, every member gets an email from RFPIS's no-reply address. If the scan only found calls to decline, no email is sent.

1. Read the counts at the top: how many new calls are **Proceed**, **Park** and **Declined**.
2. Each Proceed and Park call is listed with its funder, amount, deadline, Bid Strength and a short note on what it is about.
3. Click **Open in RFPIS**, or the title, to land on that opportunity's page. If you aren't signed in, RFPIS asks you to sign in first, then takes you there.
4. Click **Review this week's pipeline** to open Pipelines.

The top of the email. Ratings are the system's suggestion until the team updates the decision.

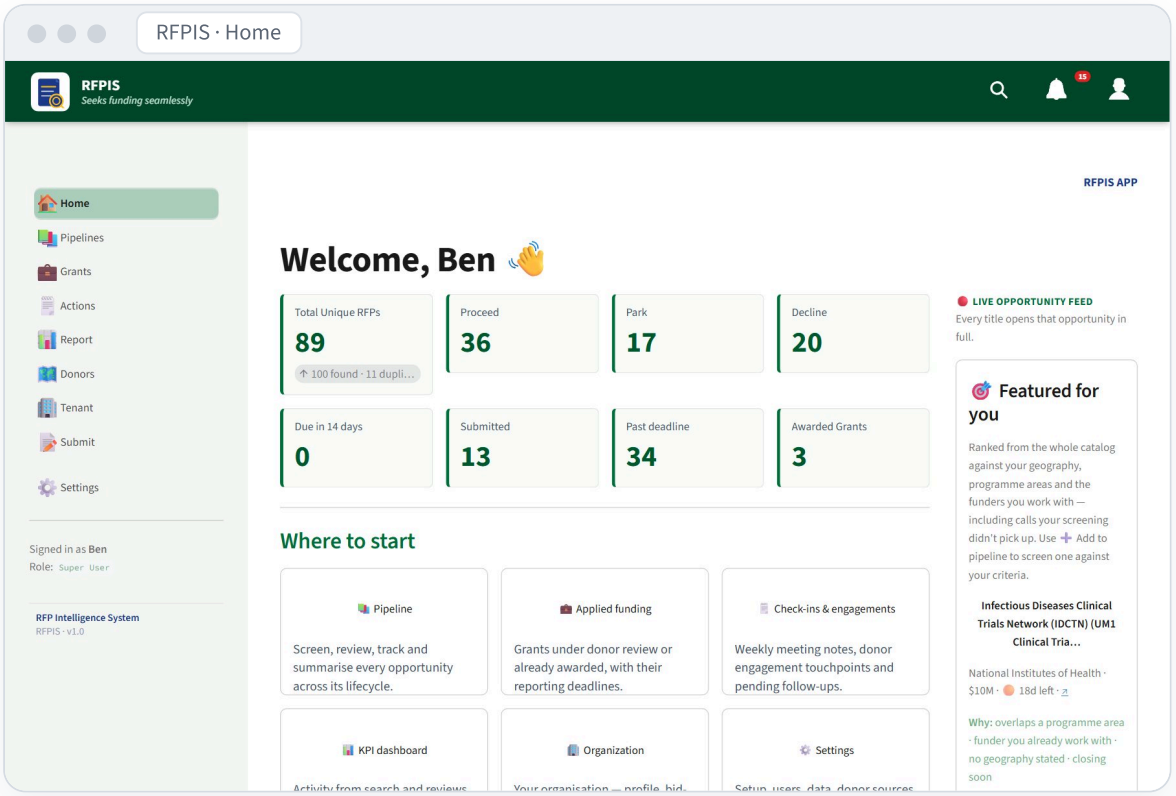

The person menu

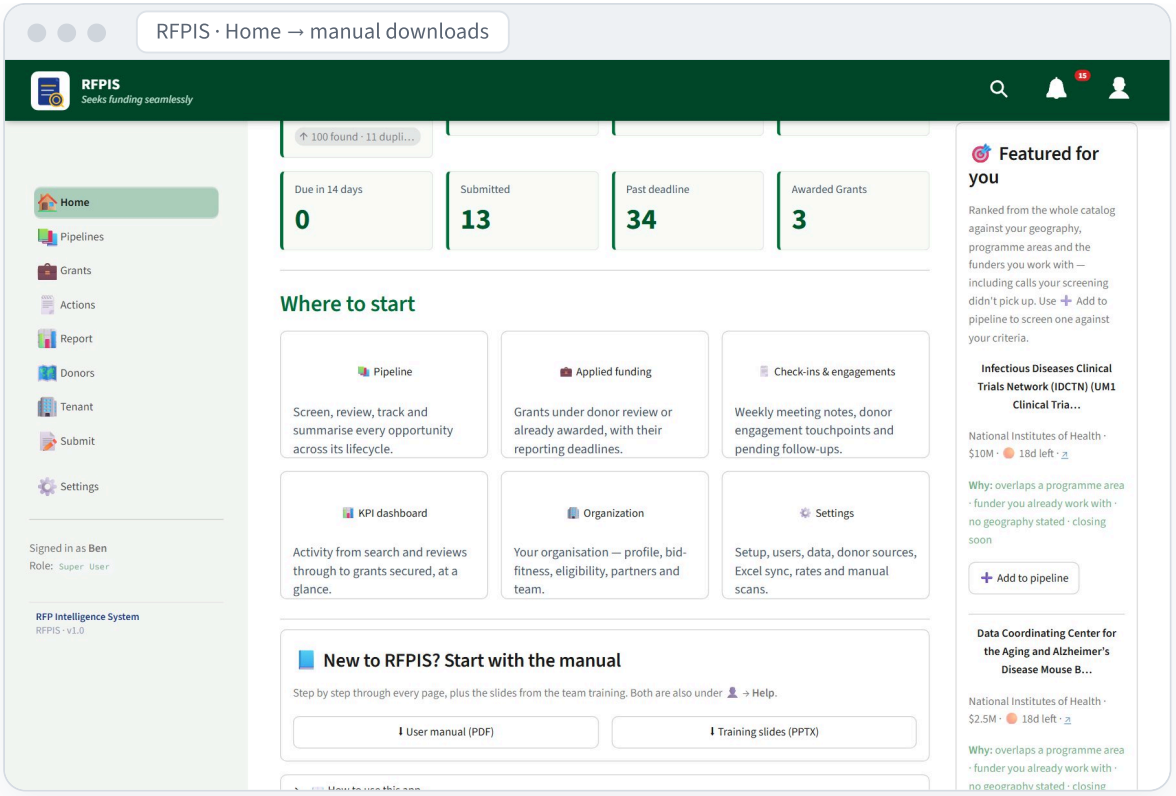

Help, Tenant, Profile and Sign Out. **Settings** appears here only for administrators.

5 The Home page

Sidebar → 🏠 Home. This is where you land after signing in.

1. **Read the numbers.** The top row shows **Total Unique RFPs**, **Proceed**, **Park** and **Decline**. The second row shows **Due in 14 days**, **Submitted**, **Past deadline** and **Awarded Grants**.
2. **Jump in.** Under **Where to start**, click a card headline, for example **Pipeline**, to open that page.
3. **Check the 🔴 Live Opportunity Feed** on the right. It has four lists: 🎯 Featured for you, ✅ Top Matches, 💰 Top Funding and ✨ Also Interesting. Click any title to open it in full.
4. On a **Featured for you** card, click **➕ Add to pipeline** to screen that call into your pipeline straight away.
5. Below **Where to start**, the 📘 **New to RFPIS?** box has this manual and the training slides to download.

Settings card

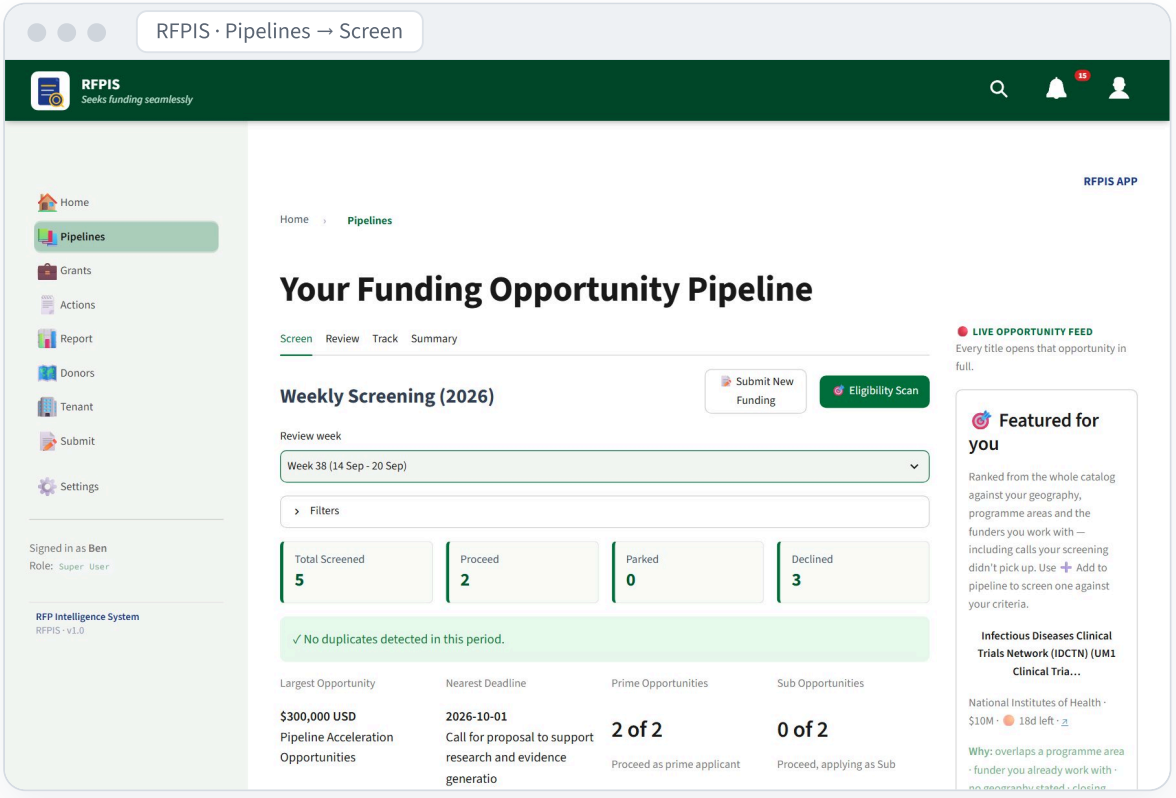

ADMIN ONLY Administrators see an extra ⚙ Settings card. Everyone else doesn't, and that's expected.

6 Run the Eligibility Scan

Sidebar → 🧩 Pipelines → **Screen** tab. Every team member can do this.

The Eligibility Scan reads the shared store of raw records against your organisation's eligibility rules. It adds the calls that fit to your pipeline. It doesn't crawl the web, so it takes **seconds**.

1. When the 🔔 bell shows **"Scan completed"**, or the new-opportunities email arrives, open 🧩 **Pipelines**.
2. Stay on the **Screen** tab. At the top right, beside 📝 **Submit New Funding**, click 🎯 **Eligibility Scan**.
3. Wait while the button shows ⌛ **Scanning…**. Don't refresh the page.
4. Read the green banner at the top. For example: *"Screened **120** curated solicitations → **8 eligible** for your org (5 newly added, 3 already in your pipeline) · 112 not a fit."*
5. Scroll down the Screen tab to see the new opportunities for this review week.

The 🎯 **Eligibility Scan** and 📝 **Submit New Funding** buttons sit at the top right of the Screen tab.

> 💡 **Run it as often as you like**
>
> Calls already in your pipeline aren't added twice. The result banner tells you how many were already there.

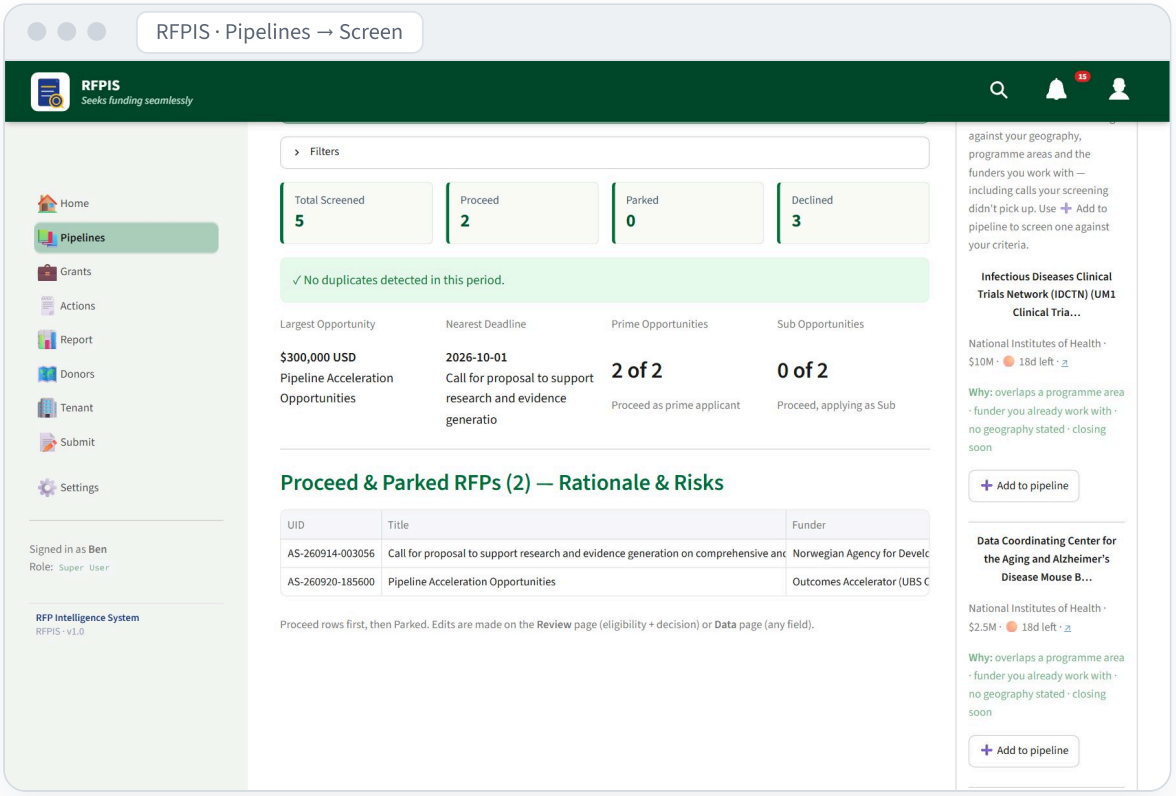

Extraction is different

SUPER USER The full **Extraction** crawls every donor site and takes 20–40 minutes. Only the platform's Super User runs it, from **Settings → Manual Scan → ⛏ Extraction**. The automatic Friday scan does the same job on a schedule. You never need to run it.

7 Read the Screen tab

Sidebar → Pipelines → **Screen**. This is the week's list, which the team walks through on the Monday call.

1. Pick the **Review week** at the top. It defaults to the current week.
2. Optional: open **Filters** to narrow by Decision, Feasibility, Geographic scope or Program area.
3. Read the counters: **Total Screened**, **Proceed**, **Parked** and **Declined**. Under them you'll see the Largest Opportunity, the Nearest Deadline, and the Prime and Sub opportunities.
4. Scroll to **Proceed & Parked RFPs — Rationale & Risks**. Each row shows the score, the system's suggestion (**Auto-rec**), the team's **Decision**, key risks and confidence.
5. To discuss one opportunity in depth, go to the Review tab.

Empty week?

If you see "No RFPs recorded for this week", click the **Jump to …** button. It takes you to the latest week that has records.

8 Review an opportunity and update the decision

Sidebar → Pipelines → **Review** tab. Every team member can update a decision.

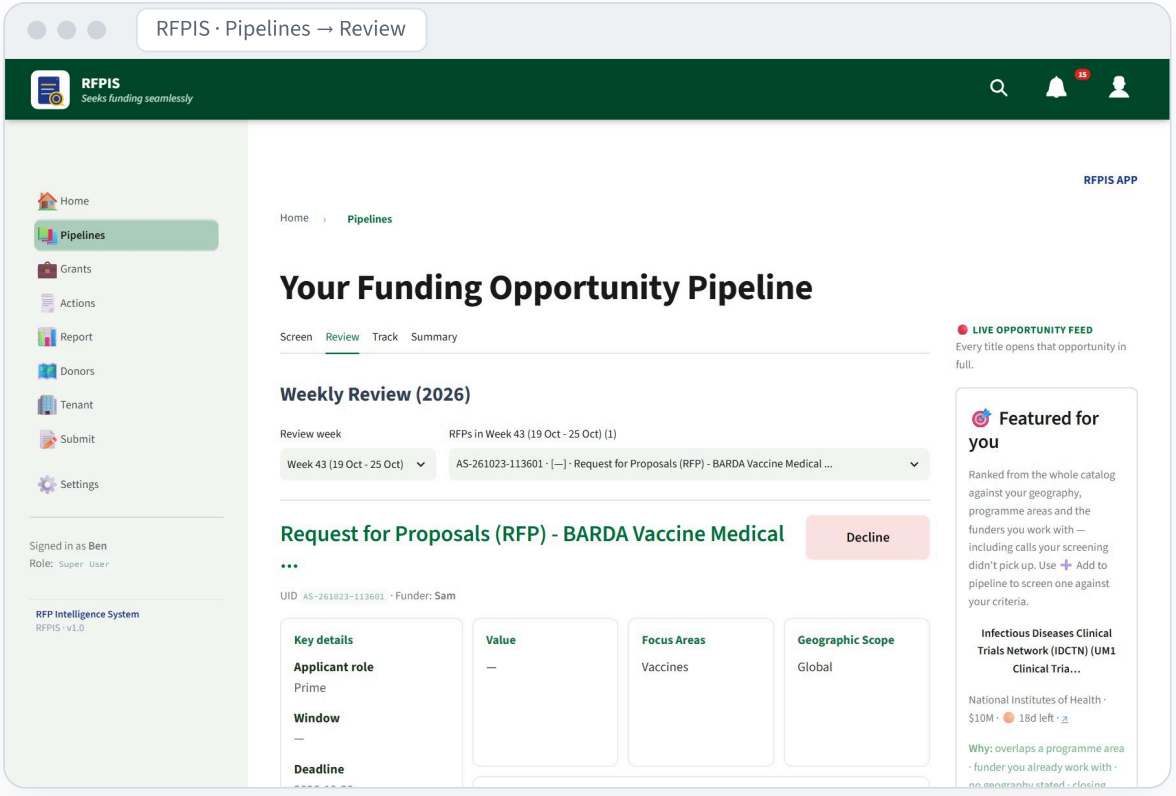

How the score works

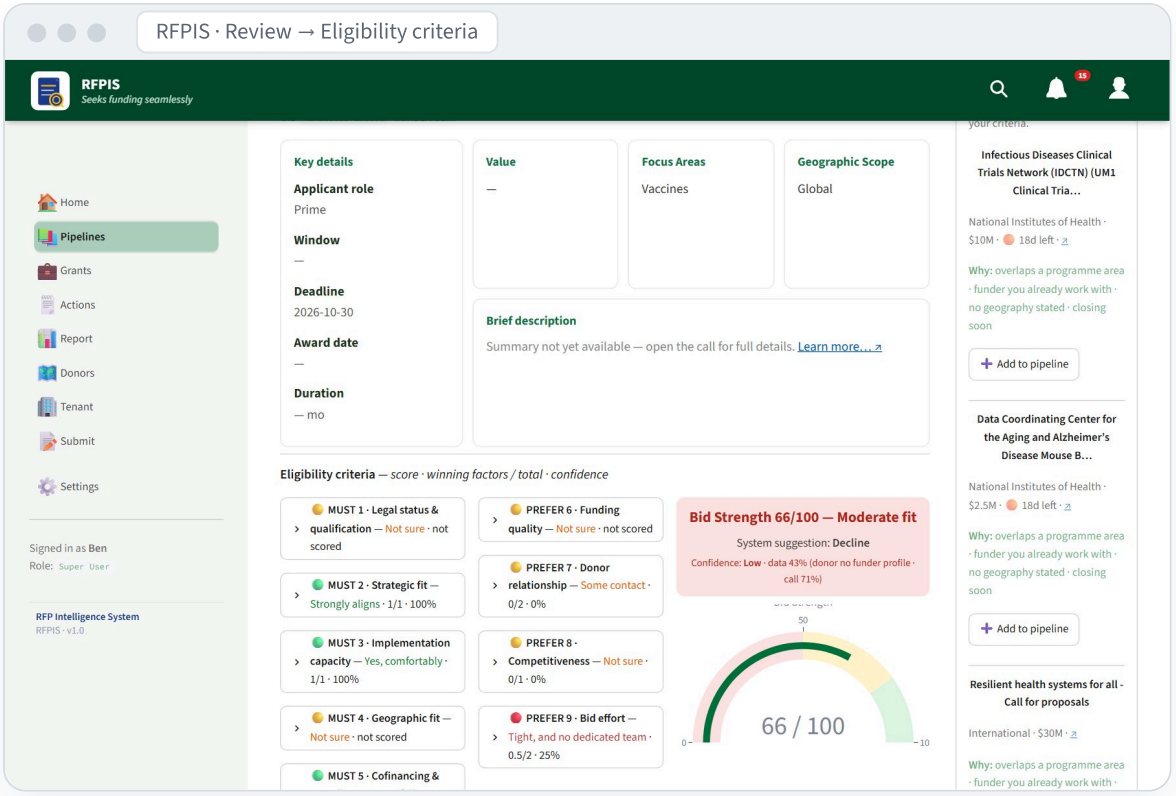

Every opportunity is scored against **nine criteria**. The five **MUSTs** make up 65% of the score: legal status, strategic fit, implementation capacity, geographic fit, and co-financing & compliance. The four **PREFERs** make up 35%: funding quality, donor relationship, competitiveness and bid effort.

Proceed	Park	Decline
Score of 90 or above	70 to 89: worth a human look	Below 70, or a fatal eligibility gate

Review an opportunity

1. Open the **Review** tab. Choose the **Review week**, then pick the RFP from the **RFPs in <week>** list.
2. Read the cards across the top: **Key details**, **Value**, **Focus Areas**, **Geographic Scope** and **Brief description**.
3. Look at the **Bid Strength** gauge, the **System suggestion** and the **Confidence**.
4. Open any criterion in the **Eligibility criteria** grid, for example "MUST 4 · Geographic fit", to see why it was met or not met.

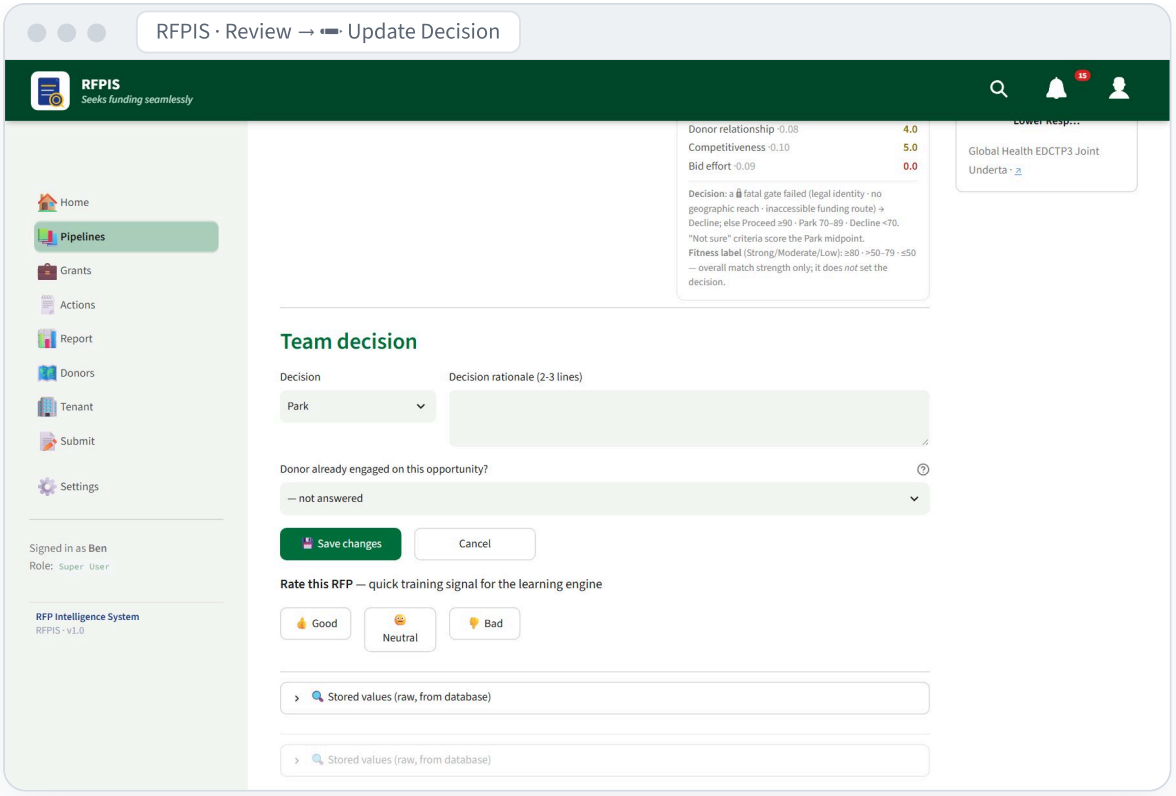

The nine criteria on the left, and the Bid Strength gauge with the system's suggestion on the right.

Update the decision

1. Scroll to **Team decision** and click **Update Decision**.
2. Optional: correct any criterion component the system got wrong. The score and suggestion follow your changes. A person who has read the call outranks the system.
3. Set **Decline flags?** (No / Yes) and write the **Key risks** in one line.
4. Choose the **Decision**: **Proceed**, **Park** or **Decline**.
5. Write the **Decision rationale** in two or three lines.
6. Answer **Donor already engaged on this opportunity?** with Yes, Partial or No.
7. Click **Save changes**. A confirmation shows the new score, suggestion and decision.

More edits: 🖍️ Edit RFP

Beside Update Decision, **🖍️ Edit RFP** opens the full record. Its tabs are Opportunity, Eligibility, Decision & Pipeline, Team, Submission & Award and Application. Use it to set the **Proposal lead**, **Assigned to**, **Next action** and **Action deadline**.

Deleting an RFP

ADMIN ONLY The **🗑 Delete this RFP** button inside Edit RFP works for administrators only. If something shouldn't be in the pipeline, **Decline** it instead.

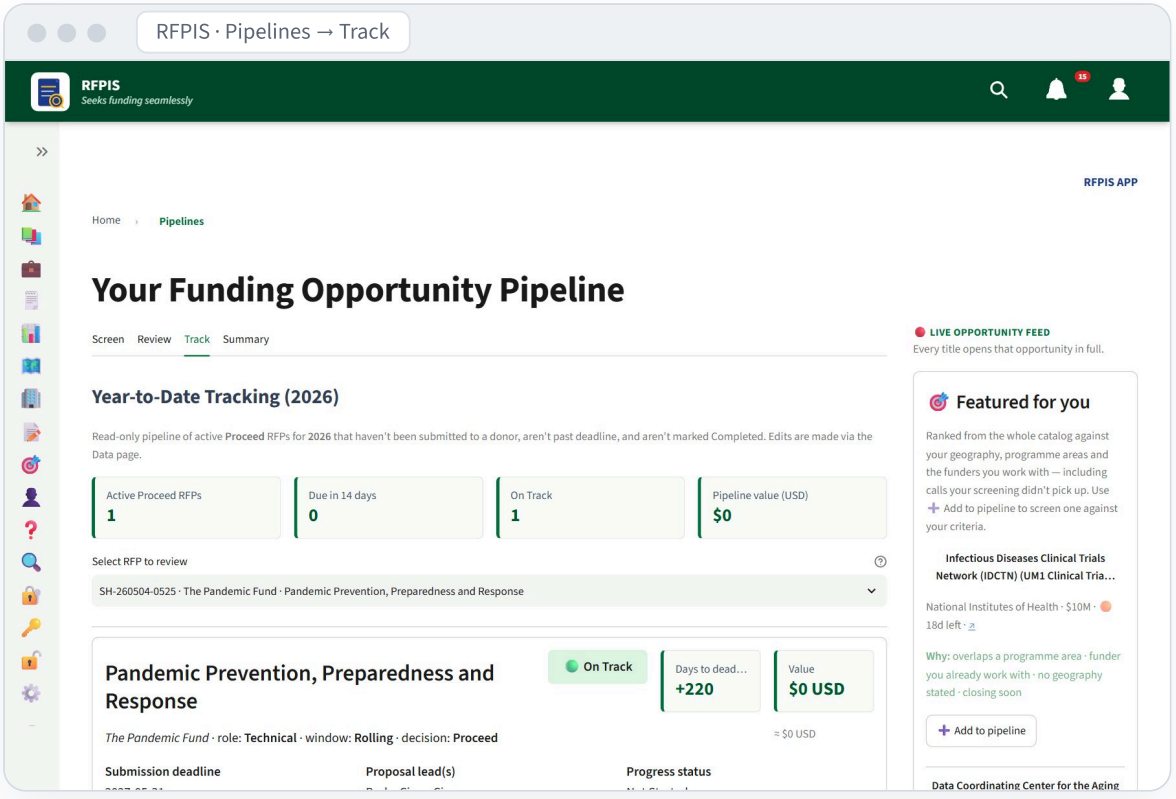

At the bottom of the Review tab, rate the RFP with **👍 Good**, **😐 Neutral** or **👎 Bad**. Your ratings teach the scoring model what your team values.

9 Track and Summary

Sidebar → 🗂️ Pipelines → **Track** and **Summary** tabs.

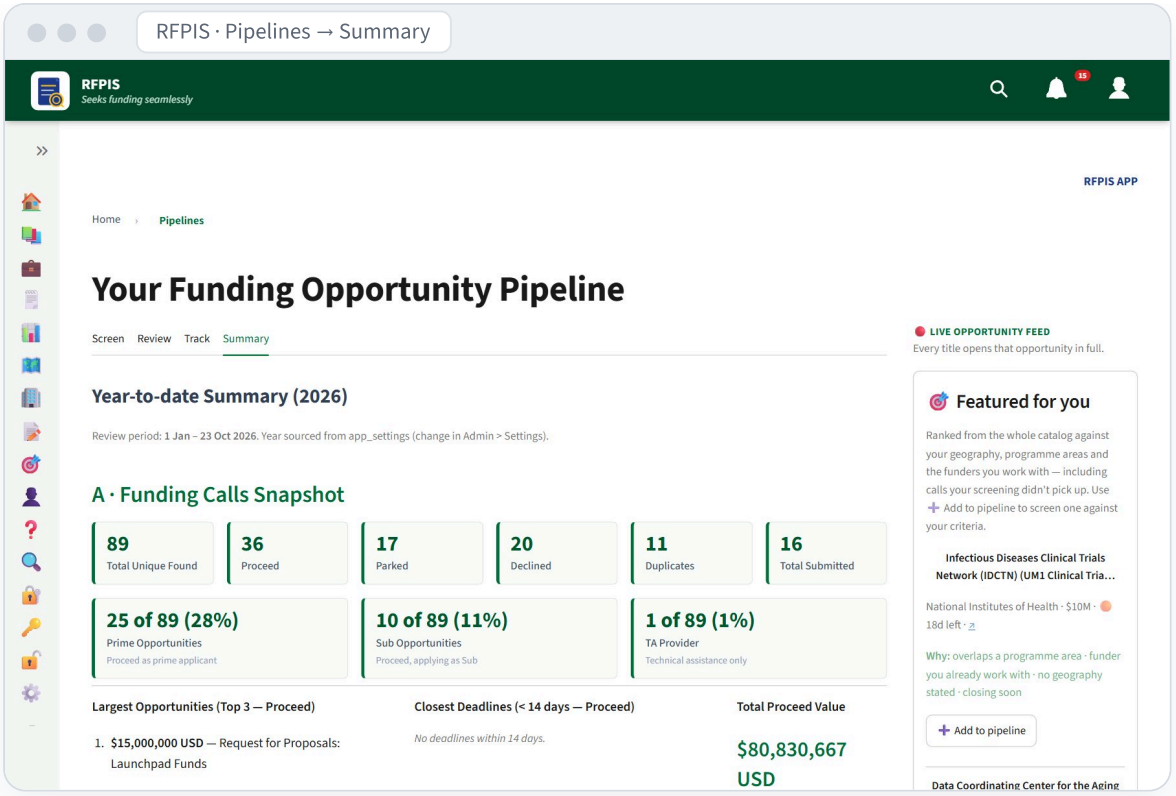

Track: opportunities you're pursuing

1. Open the **Track** tab. It lists every active **Proceed** RFP for the year.
2. Pick one in **Select RFP to review**, or click its row in the table.
3. Check **Days to deadline**, **Stage**, **Progress status** and **Proposal lead(s)**. The **Next action** comes from the meeting notes.
4. Use 🚀 **Apply on the funder's portal ↗** to go to the funder's application site.
5. Click 🖍️ **Edit** to update the stage, progress or next action.

Summary: the year at a glance

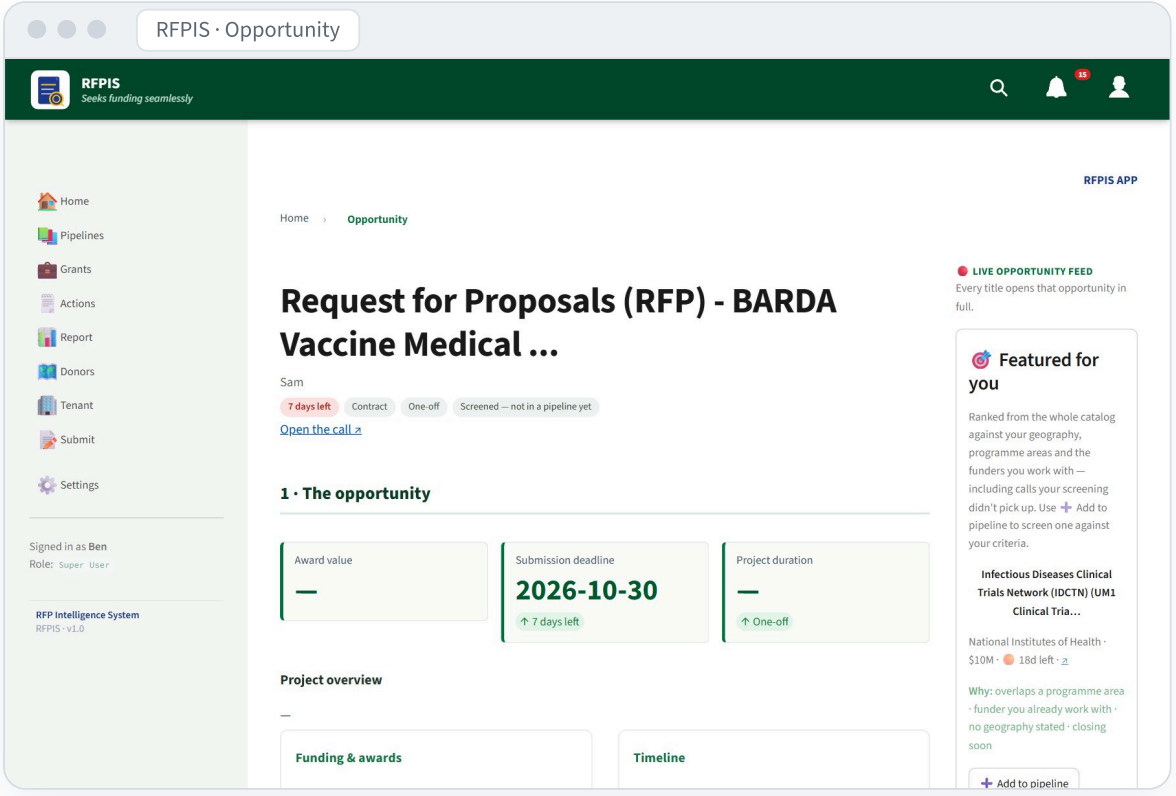

The **Summary** tab has five sections. A is the Funding Calls Snapshot, B is Pipeline health and C is Proposal development status. D is the Periodic Reflection (pick a week, month or quarter) and E is Partner engagement KRs. It's read-only and good for quarterly check-ins.

10 The Opportunity page

Click any opportunity title: in the Live Opportunity Feed, a bell item, search results, or 🔍 **View opportunity** on Review.

1. Read the chips under the title. They show the deadline status, the type of call, and whether it's **In your pipeline**, **Screened — not in a pipeline yet**, or **Shared catalogue — not screened for you**.
2. Use **Open the call ↗** and **Apply ↗** to go to the funder's own pages.
3. Read **1 · The opportunity**: award value, deadline, duration, overview and documents.
4. Read **2 · Decision aid**: how the call fares against your organisation, its Bid Strength, and **What's against it**.
5. At the bottom:
   - For an opportunity already in your pipeline, click **🖍️ Open in Review**.
   - For one from the shared catalogue, click **➕ Add to my pipeline**, or **✕ Not relevant** to dismiss it.

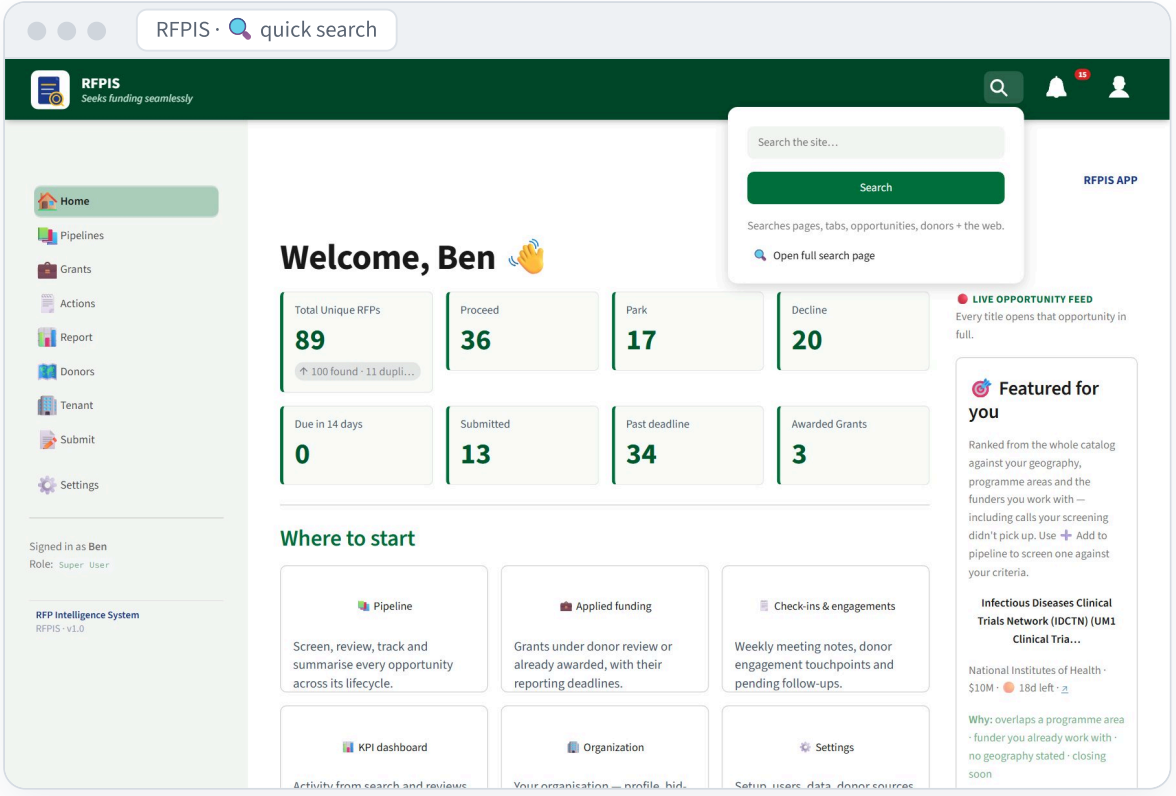

11 Search for opportunities

Top bar → 🔍 Search, or the full page at `/search`.

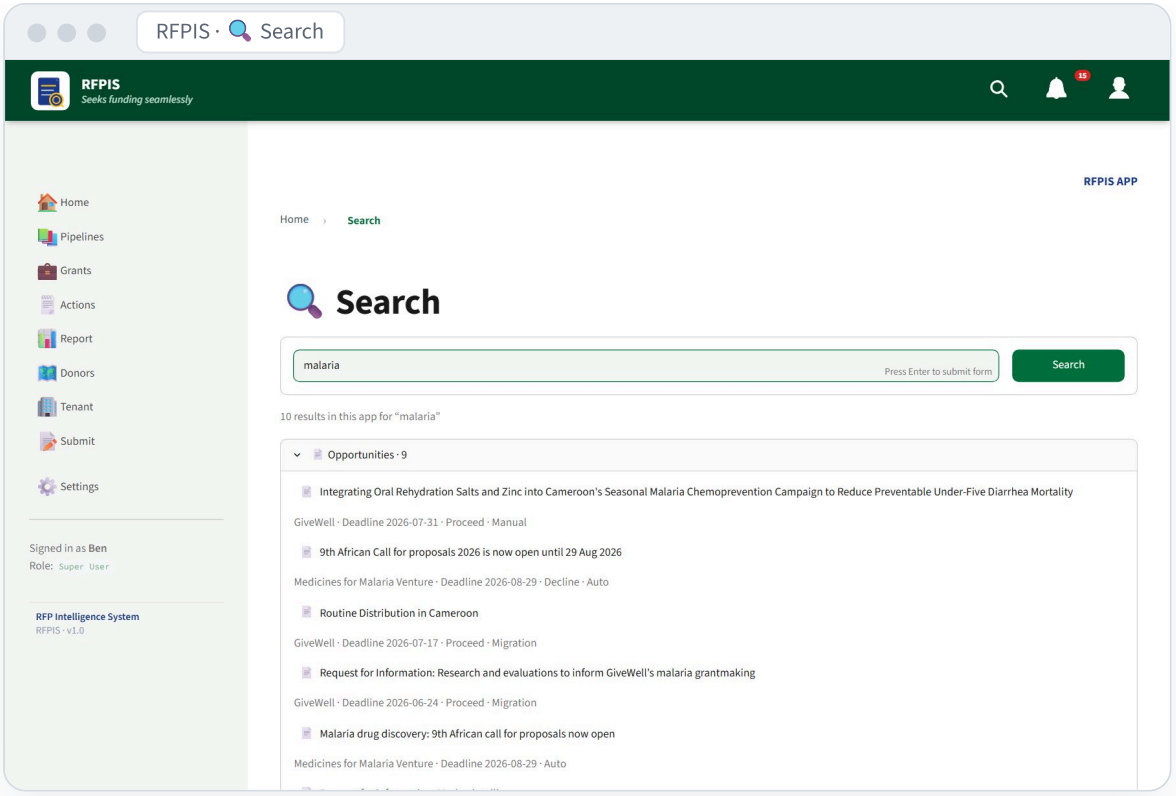

One search box looks in two places. First it searches **inside RFPIS**: pages, tabs, opportunities and donors. Then, if you ask it to, it searches **the web** for live, recent funding calls.

A. Search inside RFPIS

1. Click 🔍 in the top bar.
2. Type at least two characters, for example *malaria* or a donor's name, and click **Search**. For more room, click **Open full search page**.
3. Results are grouped under 📑 **Pages & tabs**, 📄 **Opportunities** and 🗺️ **Donors**. Open a group and click a result to go to it.

The quick search box opens from 🔍 in the top bar on every page.

B. Search the web for new calls

1. On the search page, scroll to 🌐 **Opportunities on the web**.
2. Click 🌐 **Search the web for "..."**.
3. Browse the results, 15 per page, with **‹ Prev** and **Next ›**. Rate them with 👍 😐 👎 to improve future results.
4. Found a real opportunity? Click ➕ **Track**. RFPIS scores it and adds it to your pipeline. It tells you if the call is already tracked.

> **"Web search isn't configured yet"?**
> Web search needs a key that an administrator sets up. Ask them to enable it.

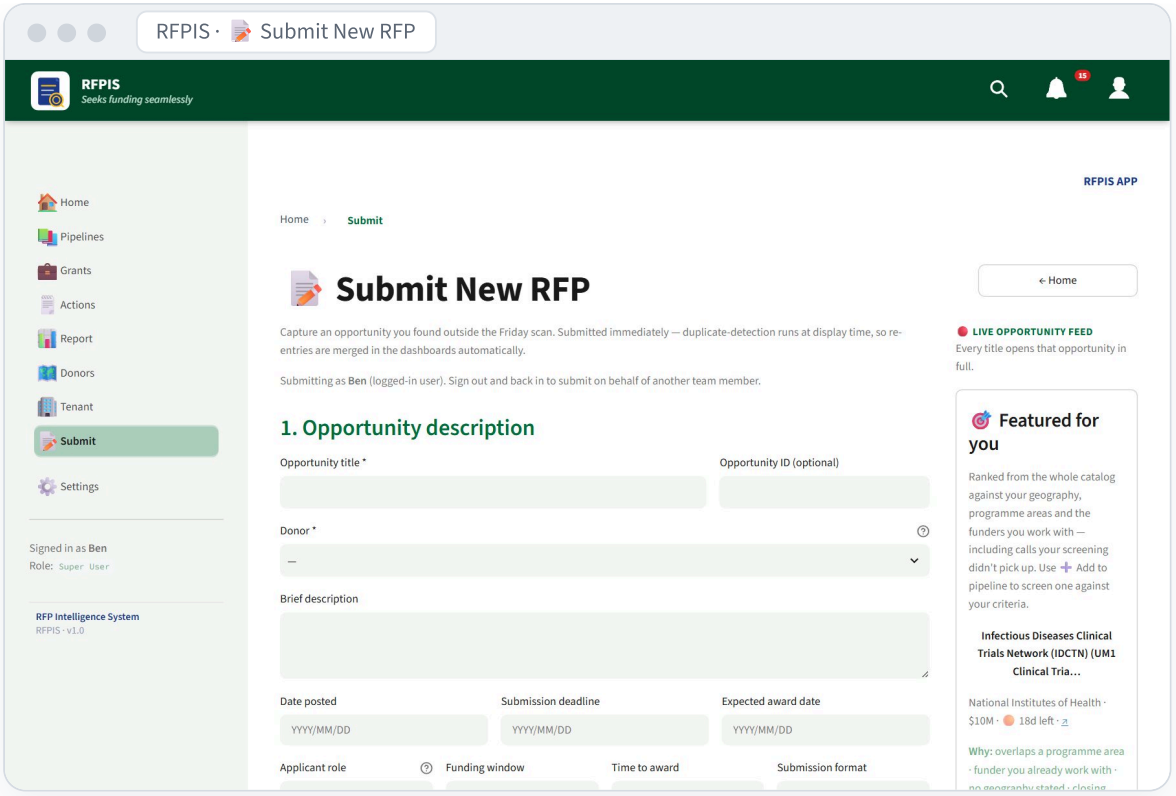

12 Submit an RFP you found elsewhere

Pipelines → Screen → 📝 **Submit New Funding**, or go to `/submit-new-rfp`. Every team member can do this.

The scans don't catch everything. A colleague might forward a call, or a donor might publish it on a partner's website. When you find an RFP that isn't in RFPIS yet, submit it here. It goes straight into your pipeline and joins the shared pool for everyone else.

> 💡 **Check first**
> Search for the title or donor with 🔍 before submitting. It may already be in RFPIS.

1. Go to 🗂️ **Pipelines** → **Screen** and click 📝 **Submit New Funding**.
2. **Section 1 · Opportunity description.** Fill in the **Opportunity title *** and the **Donor ***. If the donor isn't listed, choose *Other* and type its name. Add the deadline, the **Opportunity link (URL)**, the estimated value and currency, and the **Lead applicant ***.
3. **Section 2 · Eligibility.** For each of the nine MUST / PREFER questions, pick your best answer. Leave it as *Not sure* if you don't know.
4. **Section 3 · Decline flags & risks.** Answer **Decline flags present? *** and write the key risks in one line.
5. **Section 4 · Initial decision.** Choose your **Bid decision *** and add a short rationale.
6. **Section 5 · Team.** This appears for Proceed or Park only. Pick the **Proposal lead ***, and optionally contributors and reviewers.
7. Click **Submit RFP**. You'll see *"✅ Submitted as **UID** — alignment score X/100"*. The RFP is tagged to this review week, ready for the team call.

Fields marked * are required.

> ⚠️ **Always paste the link**
>
> RFPIS needs the **Opportunity link (URL)** to share the call with other organisations and to check it later. If the deadline has already passed, RFPIS warns you and offers 🔗 **Open … to fix this**.

13 Actions: meetings, notes and follow-ups

Sidebar → 📝 Actions. You'll use this page most during team meetings.

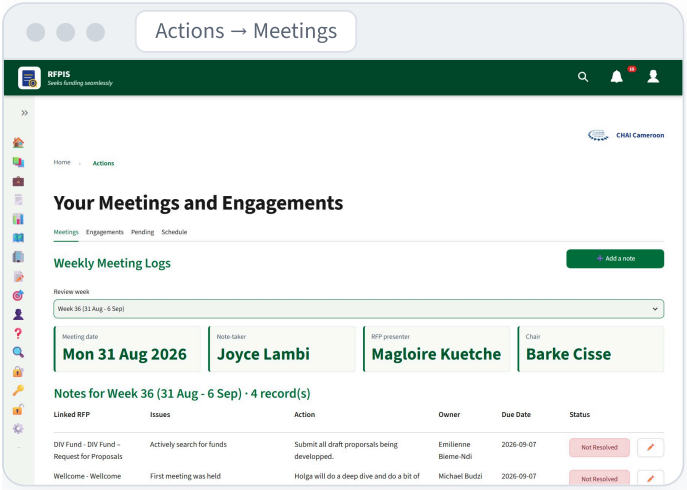

The Actions page has four tabs. **Meetings** holds the notes from each team call. **Engagements** logs contact with donors. **Pending** gathers every open follow-up. **Schedule** sets who runs each call.

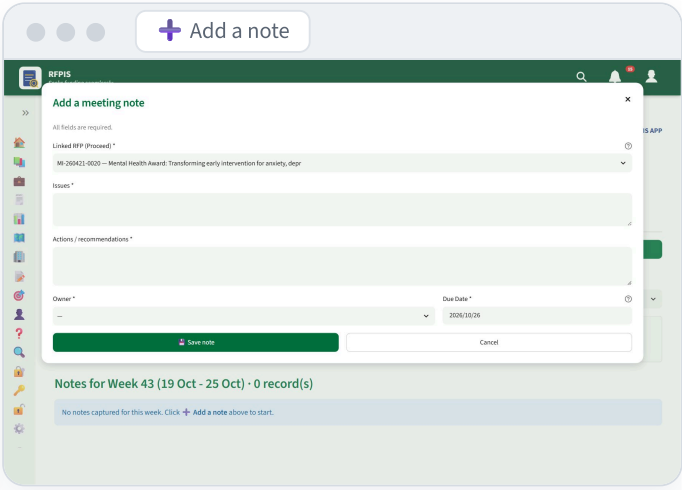

> 💡 **A good team-meeting routine**
>
> **Chair:** opens Pipelines → Screen for this week. **Presenter:** walks through each RFP on Review. **Team:** agrees on the decision, and someone clicks ✏ **Update Decision**. **Note-taker:** adds a note for each agreed action, with an owner and due date. **Before the call ends:** open Pending and close anything that's done.

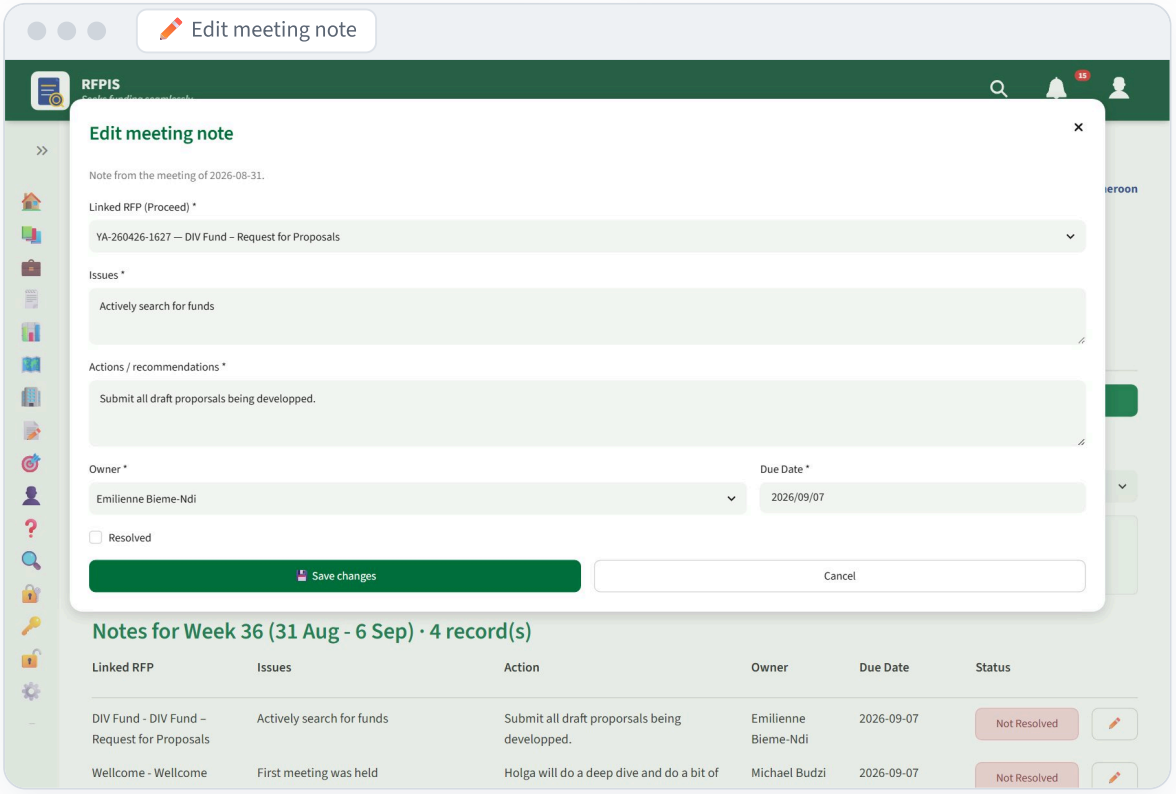

A. Meetings: capture notes during the call

Anyone on the team can take notes, whatever their role, and anyone can come back later to edit them.

1. Open 📝 **Actions** → **Meetings**. Check the **Review week**. The tiles show the **Meeting date**, **Note-taker**, **RFP presenter** and **Chair**.
2. Click ➕ **Add a note** at the top right.
3. In **Linked RFP (Proceed) ***, choose the opportunity being discussed. Only RFPs the team has agreed to pursue are listed.
4. Write the **Issues *** raised, then the **Actions / recommendations *** agreed.
5. Pick the **Owner *** and a **Due Date ***. The due date defaults to the next Monday.
6. Click 💾 **Save note**. The note appears in **Notes for <week>**.
7. Need to correct or add to a note later? Click ✏ at the end of its row, change any field, and click 💾 **Save changes**.
8. When the action is done, click its red **Not Resolved** button. It turns green: ✓ **Resolved**.
9. Need a copy for the minutes? Click ⬇ **Download <week> notes as CSV**.

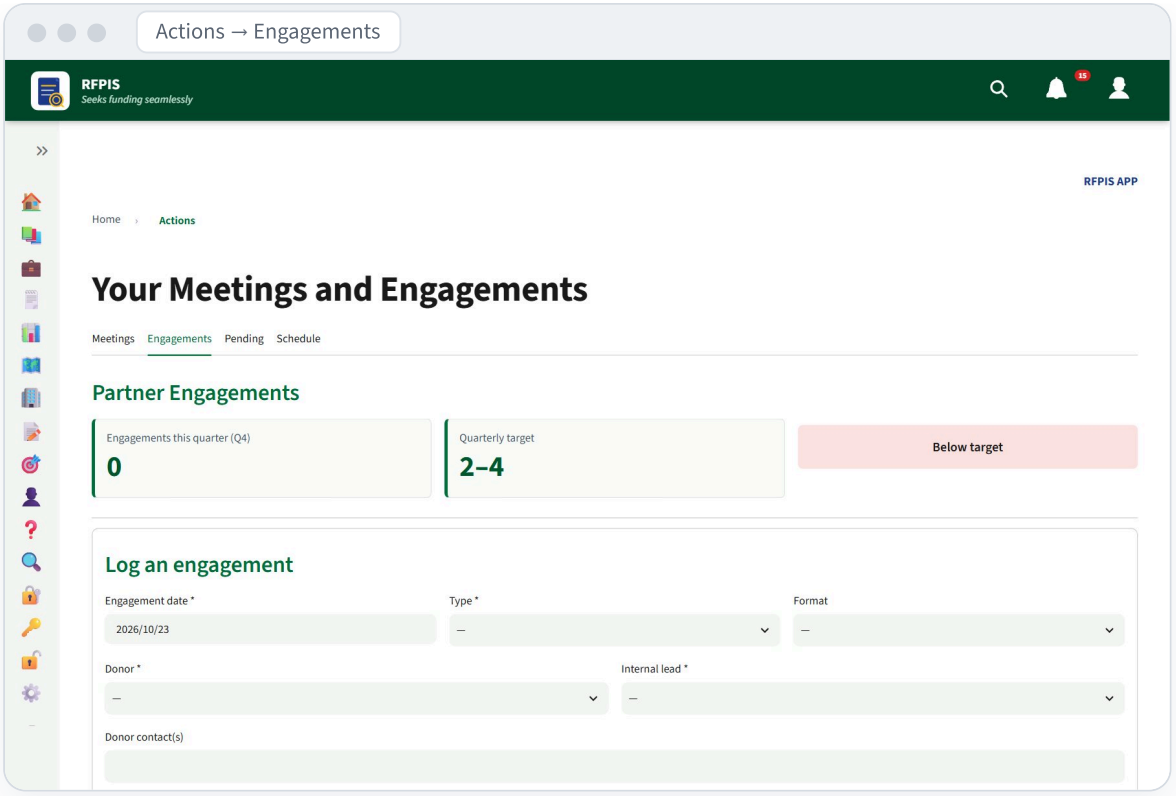

reopens a saved note with every field editable, including Resolved.

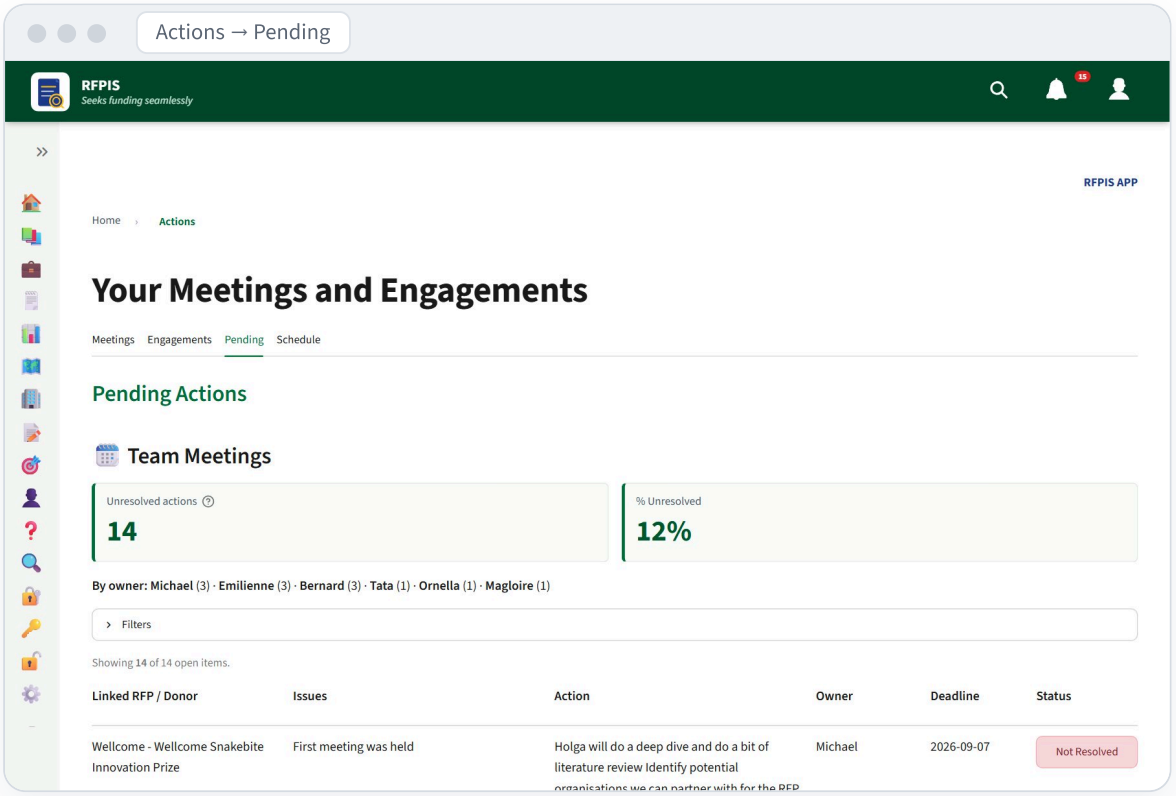

B. Engagements: log a donor touchpoint

1. Open **Actions** → **Engagements**. The top shows how many engagements you've logged this quarter against the 2–4 target.
2. In **Log an engagement**, set the **Engagement date ***, **Type *** and **Format**.
3. Choose the **Donor *** and the **Internal lead ***. Pick *Other* to type a name that isn't listed.
4. Add the donor contacts, the **Purpose** and the **Outcome / follow-up**. Link it to an RFP if there is one.
5. Click **Save engagement**.

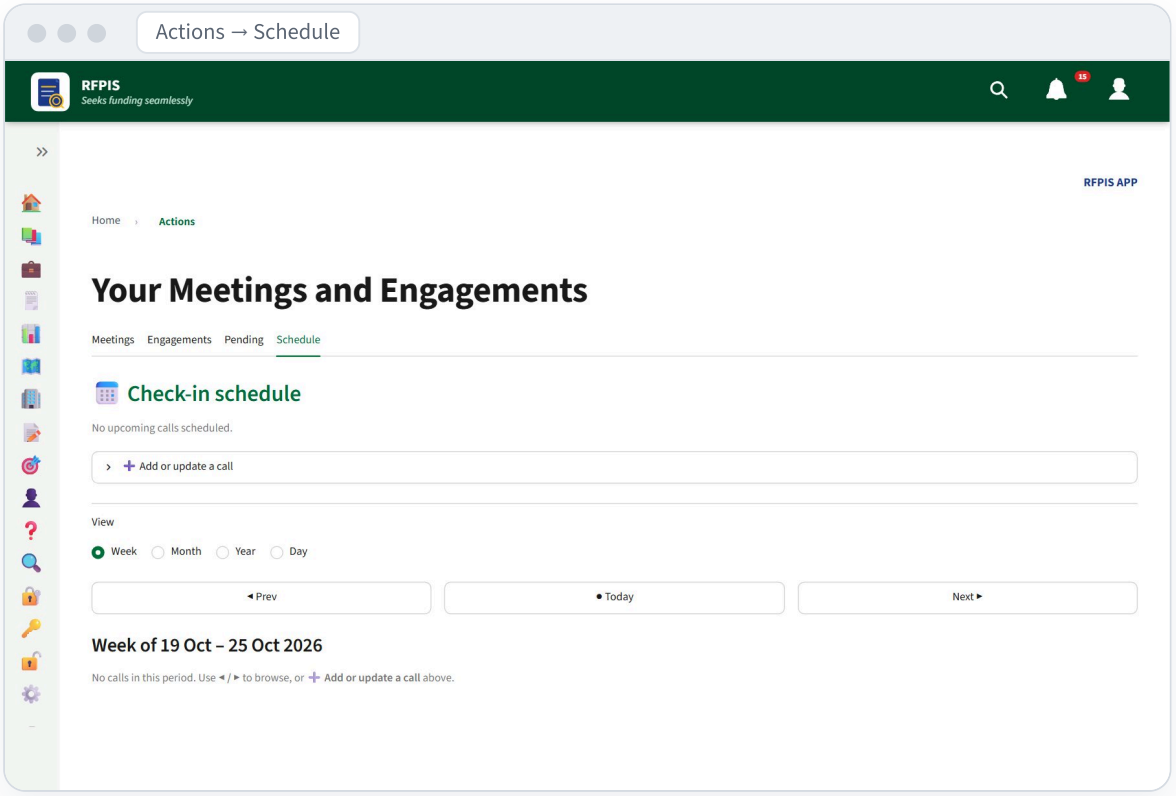

C. Pending: close your open actions

1. Open **Actions → Pending**. It shows every unresolved meeting action and donor follow-up, with a count by owner.
2. Open **Filters** and choose your name under **Owner** to see only your items.
3. When an item is done, click **Not Resolved**. It's marked resolved and drops off the list.

D. Schedule: who runs each call

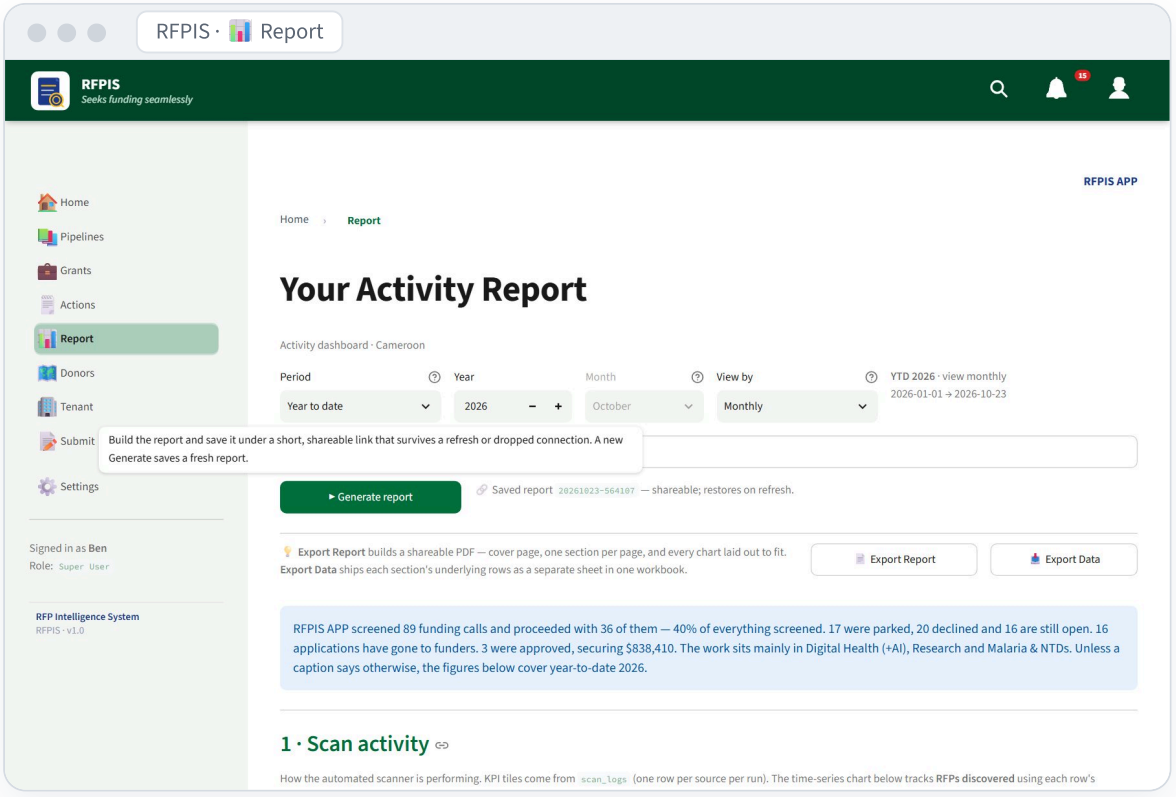

1. Open **Actions → Schedule**. Switch the **View** between Week, Month, Year and Day. Browse with **◀ Prev**, **● Today** and **Next ▶**.
2. To set up a call, open **➕ Add or update a call**. Pick the **Call date**, **Note-taker**, **RFP presenter** and **Meeting chair**, then click **💾 Save call**.

14 Generate a report

Sidebar → Report.

1. Choose the **Period**: This year, Year to date, a Specific month, Last 90 days, Last 12 months or All time. Pick the **Year**, and the **Month** if you chose a specific month.
2. Choose **View by**: Weekly, Monthly, Quarterly, Semestrial or Annually.
3. Optional: open **Advanced filter** to choose which sections and metrics to include. There are five sections: Scan activity, Team & partners, Insights, Reviews & decisions, and Our results.
4. Click **▶ Generate report**. Nothing loads until you do. The address bar then holds a link you can share with teammates.
5. To download it, click **Export Report**, then **⬇ Download PDF**. For the numbers in Excel, click **Export Data**.

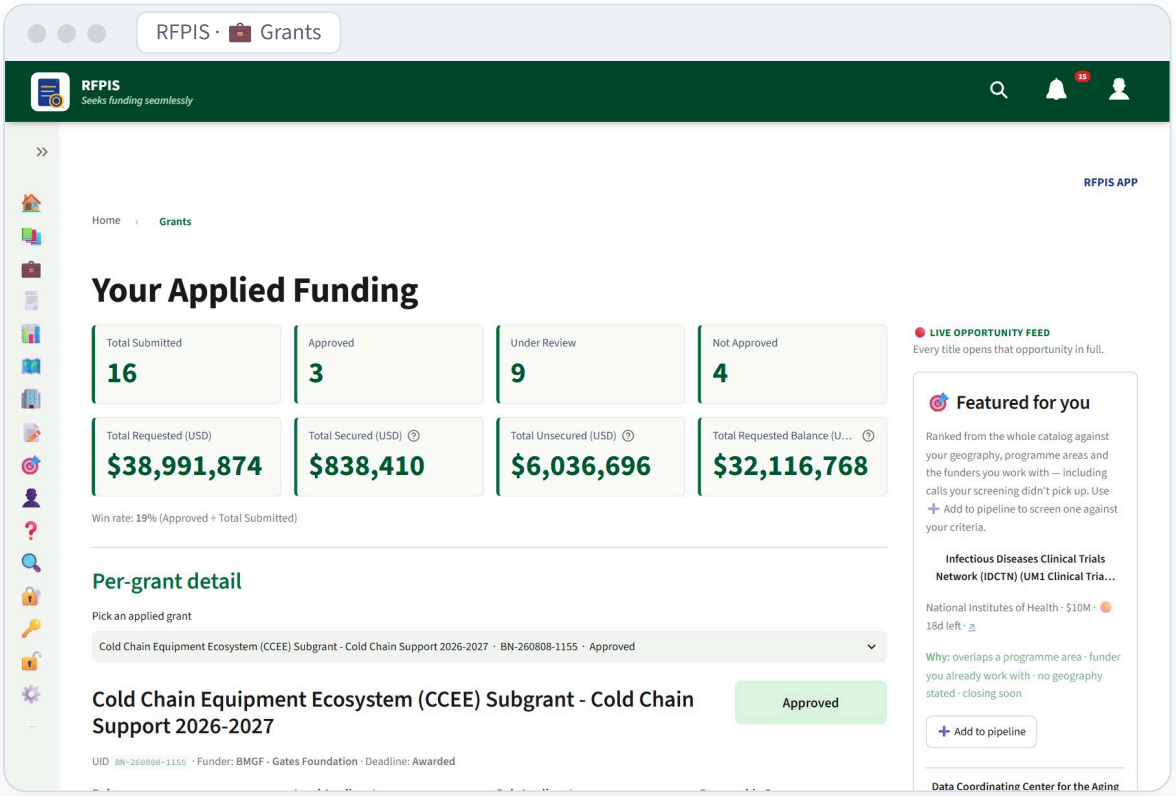

The first PDF can be slow

The first PDF export after the app restarts can take a couple of minutes. If it fails, use **⬇ Download the report as HTML instead** and print that.

15 Grants

Sidebar → 💼 Grants. Applications you've submitted, and grants you've won.

1. Read the totals: **Total Submitted**, **Approved**, **Under Review** and **Not Approved**. Below them are the amounts requested and secured, in USD, and your win rate.
2. Under **Per-grant detail**, choose one in **Pick an applied grant**. You'll see its dates, amounts, reporting deadlines and recent meeting notes.
3. Click **🖍️ Edit grant details** to record the donor's decision or the reporting dates.

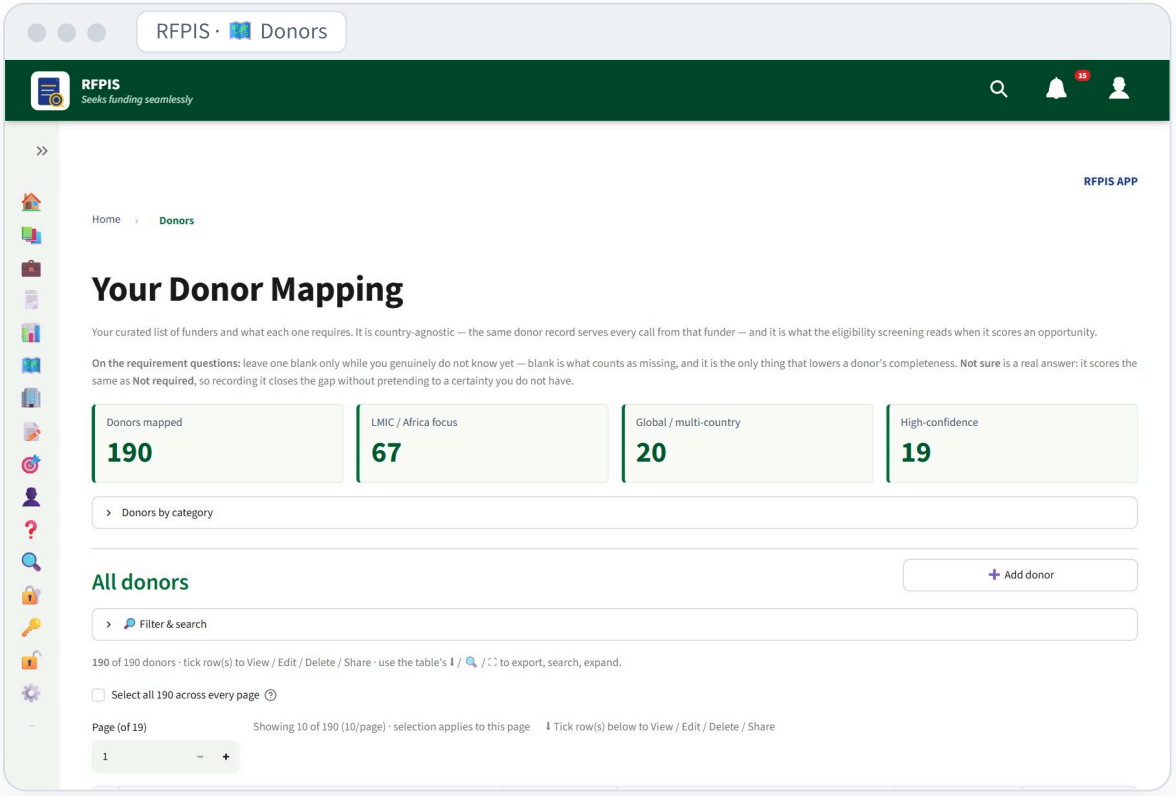

An RFP appears here once its donor decision is set (Approved, Under Review or Not Approved), or once its progress is marked *Completed*.

16 Donors

Sidebar → 🏛️ Donors. The donor catalogue: focus areas, award ranges and contacts.

1. Open **🔎 Filter & search** to find a donor by name, focus area or geography.
2. Tick a donor's row, then click **👁 View** to read its profile.
3. Click **⬇ Download / print (PDF)** in the profile for a donor brief.
4. Spotted something wrong or missing? Tick the row and click **💡 Suggest**, or use **💡 Suggest donor** to propose a new one.

Editing donors

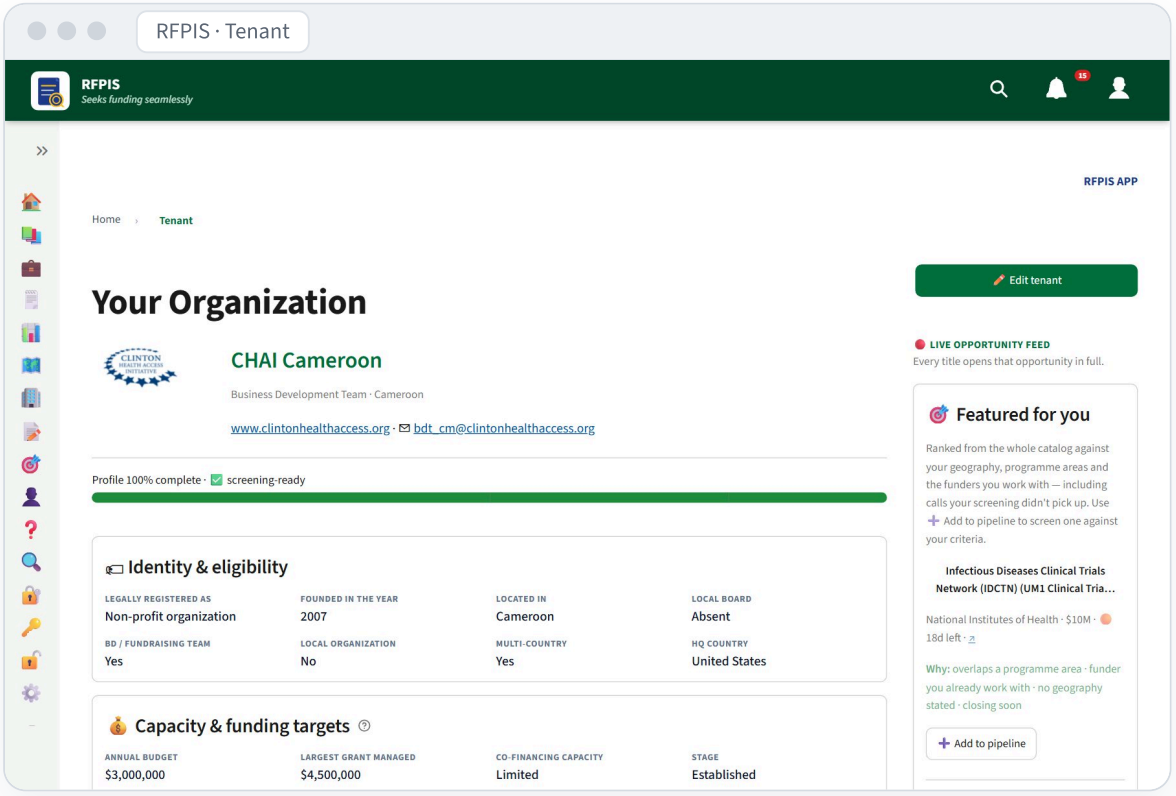

SUPER USER Only the platform owner edits the shared donor catalogue directly. Everyone else suggests changes, and the owner reviews them.

17 Your organisation (Tenant)

Person menu → **Tenant**. In this manual, the example organisation is called "RFPIS APP".

This page is your organisation's profile. RFPIS uses it to decide which calls fit you: the countries you work in, your program areas, funders and team.

1. Check the **profile completeness** bar. A fuller profile gives better matches.
2. Read the cards: 🏷 **Identity & eligibility**, 💰 **Capacity & funding targets**, 🎯 **Program areas** (graded 0–5), 🌍 **Geography & partners**, 🤝 **Funders & languages** and 👥 **Team members**.
3. If something is wrong or out of date, tell your administrator.

An example organisation profile.

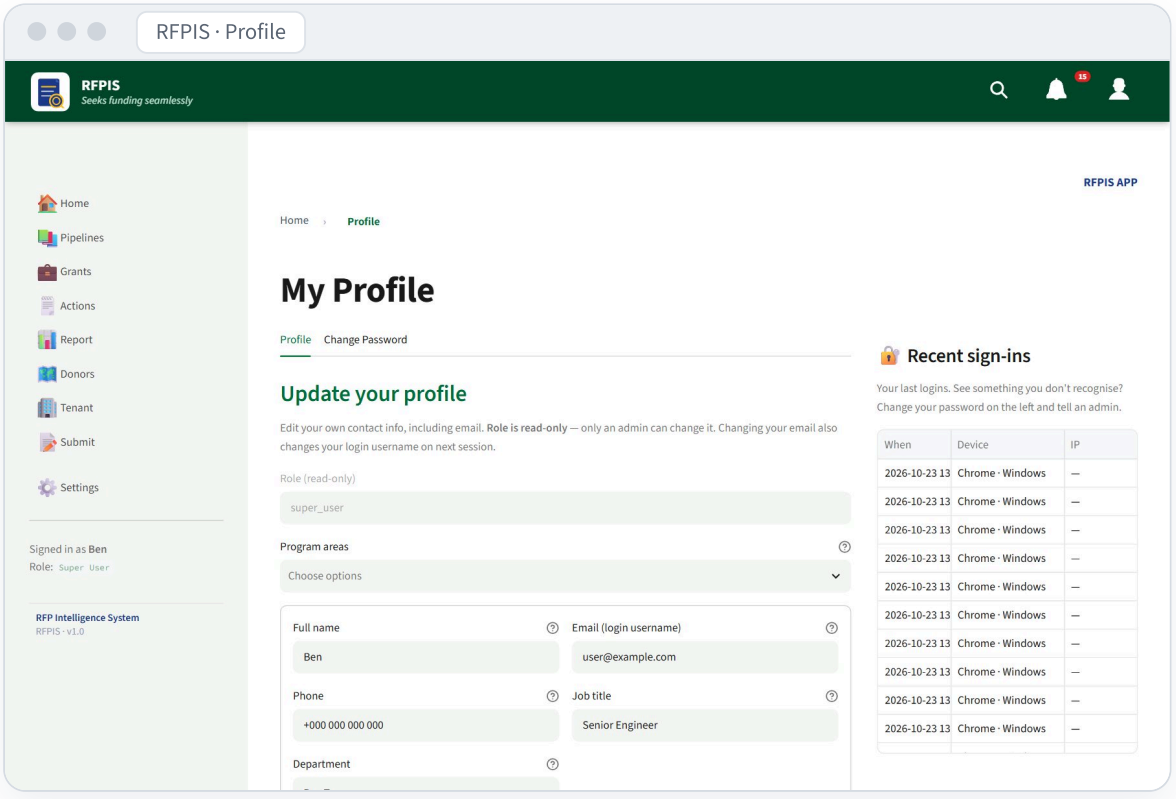

Editing the profile

ADMIN ONLY Administrators see **Edit tenant**. Everyone else sees "View only".

18 Your profile and password

Person menu → **Profile**.

1. On the **Profile** tab, update your name, phone, job title, department and location. Choose your **Program areas** too. Click **Save profile**.
2. To change your password, open the **Change Password** tab. Enter the current password, then the new one twice, and click **Change password**.
3. Check **Recent sign-ins** on the right. If you don't recognise a sign-in, change your password and tell your administrator.

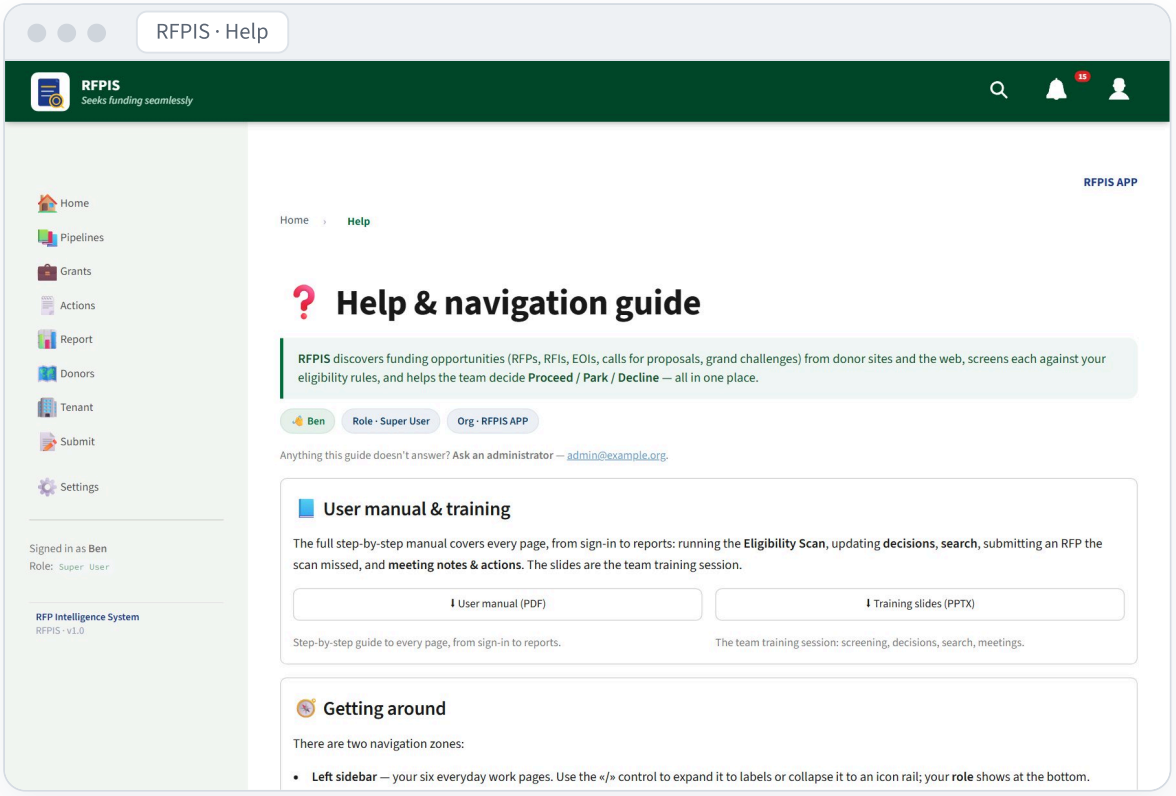

Deleting your account

Danger zone — delete my account removes your login only. The notes, decisions and records you added stay in RFPIS for the team.

19 The Help page and getting help

Person menu → **Help**.

1. Click at the top right, then **Help**.
2. At the top, download this **User Manual (PDF)** or the **Training slides (PPTX)**.
3. Read **Getting around**, **How an opportunity flows** and **How an opportunity is scored** for a quick refresher.
4. Still stuck? Contact your administrator. The Help page shows the address to use.

Also on Home

The manual and training slides can also be downloaded from the **Home** page, in the **New to RFPIS? Start with the manual** box below **Where to start**.

20 Settings ADMIN ONLY

👤 Person menu → **Settings**, or the ⚙️ sidebar link. If you're not an administrator, you can skip this chapter. You won't see these options.

🔒 **Why you might not see Settings**

Settings is visible only to **Admins** and the **Super User**. If you open it without that role, you'll see "Admins only."

🏗️

Setup

Organisation profile, bid fitness, team members, and **Scan Preferences** (countries, themes, criteria, search terms, currency). These rules drive the Eligibility Scan.

👥

Accounts → Users

➕ **Add User** sends the invitation email. Each user has **Edit** (change role), **Reset password**, **Delete** and **Blacklist**.

🗃️

Records

The full data tables: Screened and Extracted Solicitations, Meeting Logs, Engagement Logs, Applied Funding. You can view, edit, export and share them.

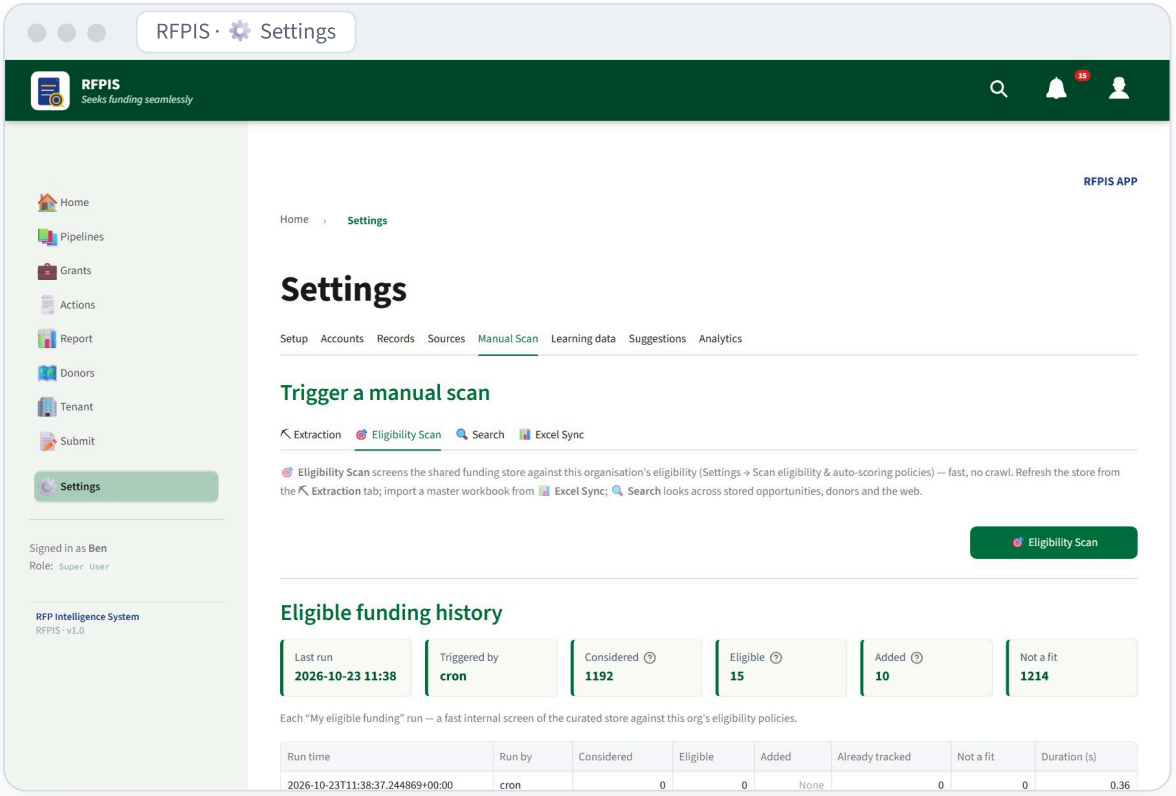

🎯

Manual Scan

Eligibility Scan (the same as on Screen), with its history; **Search**; and **Excel Sync**. ⛏ **Extraction** is for the Super User only.

Add a teammate ADMIN ONLY

1. Go to **Settings → Accounts → Users** and click ➕ **Add User**.
2. Enter their name and email (for example *user@example.com*) and choose a role. **Contributor** suits most of the team. **Admin** adds Settings.
3. Click ➕ **Create user**. RFPIS emails them an activation link that works for 7 days.

Glossary

Raw records
Every call the crawl found, from every country and theme, before screening.

Eligibility Scan
Screens raw records against your rules. Only the calls that fit join your pipeline.

Review week
The Monday-to-Sunday week an RFP is tagged to for the team call.

Proceed / Park / Decline

Pursue it / revisit it later / don't pursue it.

Bid Strength

A score from 0 to 100 across the five MUSTs and four PREFERs.

Tenant

Your organisation's own space in RFPIS, for example "RFPIS APP".
